Abstract

The members of Coccinellidae are among the most important biological control agents being used throughout the world. The objective of this study was to provide the current scenario of this family in Saudi Arabia. Collection surveys of ladybird individuals were conducted throughout Saudi Arabia. A total of 5400 specimens of Coccinellidae were collected belonging to 51 species in 19 genera and seven tribes: Sticholotidini (2 genera / 10 species), Coccidulini (1/3), Scymnini (4/24), Diomini (1/1), Hyperaspidini (1/3), Chilocorini (3/8), Noviini (1/3), Coccinellini (8/11), Epilachnini (2/2). One genus, *Clitostethus*, and eight species and subspecies, *Cheilomenes lunata lunata* (Fabricius, 1775), *Clitostethus arcuatus* (Rossi, 1794), *Nephus ornatulus* Korschefsky, 1931, *N. nigricans* (Weise, 1879), *Pharoscymnus fleischeri* (Weise, 1883), *Novius yemenensis* Raimundo & Fürsch, 2006, *Scymnus* (*Scymnus*) *scapuliferus* Mulsant, 1850, and *Stethorus endrodyi* Fürsch, 1970, are reported as new records to Saudi Arabia. Two endemic species, *Scymnus agrumi* and *S. arabicus*, were recorded. This study also describes the geographical distribution for each species and the diagnostic characters for new records.

Keywords

Checklist, ladybird beetles, new records, Saudi Arabia, zoogeographical distribution

Introduction

The members of Coccinellidae comprise one of the most important biological control agents being used throughout the world (Obrycki and Kring 1998). This family deserves its own superfamily Coccinelloidea in the suborder Polyphaga (Robertson et al. 2015) and represents approximately 6000 described species in 360 genera worldwide, of which approximately 90% are considered as predators (Vandenberg 2002; Hesler 2009; Magro et al. 2010). Monitoring the diversity of coccinellid species is crucial for integrated pest management programs and for incorporating the biological control of numerous arthropod pests. Coccinellids are relatively well known and commonly known as ladybird beetles in Australia, South Africa, and Great Britain and ladybugs in North America (Magro et al. 2010; Roy and Migeon 2010). These beetles can be found in various habitats, ranging from highly urbanized areas to the types of agro and natural ecosystems (Leather et al. 1999).

Before this study, a total of 56 species were reported from Saudi Arabia in 20 genera and 12 tribes (Kapur 1959; Shalaby 1962; Beccari 1971; Martin 1972; Fürsch 1979; Talhouk 1982; Walker and Pittaway 1987; Fürsch 1989; Raimundo and van Harten 2000; Kovář 2007). The first study on ladybird beetles of Saudi Arabia was conducted by Kapur (1959) with an initial record of 32 species from southwestern Arabia (southwestern KSA and Yemen). Subsequently, Hesler (1962) listed three species, *Exochomus flavipes* Thunberg, *Epilachna hirta* Thunberg, and *Thea 16-notata* (Mulsant 1850), from KSA. Beccari (1971) listed 10 species, *Adonia variegata* (Goeze, 1777), *Chilocorus bipustulatus* (L., 1858), *Cheilomenes propinqua vicina* Mulsant, 1850; *Coccinella 7-punctata* (L., 1758); *C. 11-punctata* (L., 1758); *Epilachna chrysomelina* (F., 1775); *E. hirta* (Thunberg, 1781); *Exochomus flavipes* (Thunberg, 1781); *Scymnus punctillum* (Weise, 1891); and *Thea 16-notata* (Mulsant, 1850), from KSA. Fürsch (1979) provided an identification key for 35 species, describing two new species, *Nephus wittmeri* Fürsch, 1979; and *Pharoscymnus arabicus* Fürsch, 1979, and one new subspecies, *N. hiekei riadhensis*. Walker and Pittaway (1987) provided comprehensive comments, colour photographs, distributional information, and maps for four species of coccinellids occurring in Eastern Arabia. Fürsch (1989) also examined the groups of the species-rich genus *Scymnus* of the Arabian Peninsula and recorded only six species from KSA, including two new species, *S. arabicus* Fürsch, 1989, and *S. luxorensis* Fürsch, 1989. Later, Raimundo and van Harten (2000) provided the description of the new species *Serangium buettikeri* Fürsch, 2000, from KSA and Yemen. The family Coccinellidae of the Palearctic region was catalogued by Kovář (2007), who listed 41 species from KSA.

Several researchers have been exploring the diversity of Coccinellidae in the adjacent countries of Saudi Arabia. Yemen represents the highest diversity of coccinellids with 85 species (Raimundo and van Harten 2000; Raimundo et al. 2006). In the United Arab Emirates, 23 species have been reported to date (Raimundo et al. 2007; Gillett 2009), including a phytophagous species, *Henosepilachna elaterii orientalis* (Zimmermann, 1936). In Jordan, seven species of coccinellids, *C. bipustulatus*, *Pharoscymnus ovoideus* Sicard, 1929, *Cheilomenes propinqua vicina*, *E. quadripustulatus*,

Scymnus subvillosus (Goeze, 1777), *S. rubromaculatus* (Goeze, 1777), and *Oenopia conglobata* (Linnaeus, 1758), have been recorded (Awameleh et al. 2009).

Syria has 20 recorded species of Coccinellidae (Khalil and Mourad 2005, 2006). In Egypt, 59 coccinellid species have been recorded (Alfieri 1976; Al Akkad 1979). In Palestine and adjacent areas, 71 species of coccinellids have been reported (Halperin et al. 1995). In the present study, the objective was to provide the current status of the family Coccinellidae for the KSA, the largest land mass of the Arabian Peninsula, by surveying the species of this family in selected regions of KSA, to identify the Coccinellidae specimens in the King Saud University Museum of Arthropods (KSMA) and Arabian National Museum of Arthropods, Ministry of Agriculture (ANMA), and the specimens that were collected during the present investigation.

Materials and methods

Collection surveys were conducted throughout the KSA (Figure 1) using beating sheets, malaise traps, sweep net, light traps, and sucking traps and by handpicking. Additional materials were examined from KSMA, ANMA, both in Riyadh, Saudi Arabia. Adult coccinellid beetles of large size were mounted immediately whenever possible using #2 and #3 pins (Monarch Brand from www.bioquip.com). Small-sized coccinellid beetles were mounted on small pieces of stiff paper, and some were preserved in 70% ethanol for dissection purpose and were deposited in KSMA.

For the dissection of genitalia, the method of Davis (2009) was followed with some modifications. Specimens were first relaxed by soaking in warm water for 10–15 min. The abdomen was separated from the body under a stereomicroscope using fine needles

Figure 1. Map of Saudi Arabia indicating collection localities.

or forceps with small-sized tips. After extracting the genitalia (male genitalia or spermatheca) from the abdomen, they were placed in 10% KOH solution for 5–10 min depending on the amount of tissues. After removing from the KOH solution, the genitalia were placed in water to neutralize any KOH for 2–5 min, glued onto a small card using yellow glue (# 1160 shellac gel), and placed underneath the specimen. Original illustrations were completed in addition to production of digital images using an Auto-Montage version 1.2 with Micropublisher 5.0 RTV digital camera from the Q Imaging Company, Canada, installed on a Leica microscope type MZ 12.5 (Leica Company, Germany). All images were enhanced using Adobe Photoshop CS5.

The following information is provided for each species: current combinations of names and their synonymies, brief diagnosis (for new records only), remarks, material examined, country and world distribution (after Kovář 2007, for abbreviations see Table 1), and published records in KSA. The data for the material examined are arranged as follows: name of the province, followed by locality, the coordinates, elevation above sea level, the date of collection (months in Roman numerals), the collection methods (handpicking (HP), light trap (LT), malaise trap (MT), pitfall trap (PT), beating sheet (BS), sweeping net (SN), sucking (SU), and sticky traps (ST)), collector names, and the number of examined specimens, followed by sex (♂, ♀ for identified sex and ex(s) for unidentified sex). A brief diagnosis of each new record species was added. New record species are marked with an asterisk. Geographical coordinates were obtained from GPS for specimens that were collected by the authors or obtained from the label data under the investigated individuals for specimens that were collected in KSMA or ANMA.

Species were identified using original description and all available literature reports such as Fürsch (1979; 1989), Raimundo and van Harten (2000), Raimundo et al. (2006), and Raimundo et al. (2007) and by examining the reference collection from ANMA and KSMA. Taxonomy on the tribe and genus levels follows Nedvěd (2020). Detailed accounts for each species and their ecological notes are also provided.

Zoogeographical regions

Acronyms for Zoogeographical regions used throughout text:

AFR	Afrotropical region	NAR	Nearctic region
AUR	Australian region	NTR	Neotropical region
ORR	Oriental region	PAR	Palearctic region

Results

In total, 5400 specimens including both fresh collections from KSA and preserved materials in KSMA and ANMA were examined, of which 51 species were recognized in this investigation, including eight new records to the country (Table 2). Two endemic species *Scymnus agrumi* and *S. arabicus* were recorded.

Table 1. Acronyms for the countries are given following Kovář (2007).

Local distribution. This species was collected from southwest of KSA, Asir, and Jizan and was previously reported by Talhouk (1982) from Jizan.

World distribution. **Asia:** SA and YE; **AFR** (Kovář 2007).

Chilocorus* Leach, 1815**Chilocorus bipustulatus* (Linnaeus, 1758)**

Coccinella bipustulata Linnaeus, 1758: 367.

Remarks. This species is known as the biocontrol agent of the scale insect *Parlatoria blanchardi* (Targioni Tozzetti 1892), a date palm pest, and *Aonidiella orientalis* (Newstead 1894), a pest of *Citrus* spp. (Martin 1972), and is widely distributed throughout the world. In the present study, its adults were collected from date palm orchards on the grasses and shrubs under the palm tree and in the agroecosystem on the grasses.

Material examined. old collection from ANMA, **Riyadh:** Ad Diriyah, Education farm, 24°40'N, 46°35'E, 26.III.1975, 1♂, hand written label (date palm orchard); Wadi Hanifah, 24°45'N, 46°36'E, 26.I.1977, Al Shaqaty, M., ANMA, 1ex; Riyadh, 24°43.01'N, 46°38.65'E, 4.III.1979, Sarhan, K. and Shalaby, F., 29exs, hand written label [grasses]; V.1966, ANMA, 1ex.

Local distribution. This species was found in Riyadh region and listed by Martin (1972) and reported by Beccari (1971) from Riyadh and by Talhouk (1982) from Riyadh and Eastern region.

World distribution. **Asia:** AF, CY, FE, GAN, IN, IQ, PAL, JO, KI, KZ, LE, MG, SA, SI, SY, TR, UZ, and XIN; **Europe:** AB, AL, AR, AU, AZ, BE, BH, BY, CZ, CT, DE, EN, FI, FR, GB, GE, GG, GR, HU, IR, IT, LA, LT, LU, MA, MC, MD, NL, NR, NT, PL, PT, RO, SK, SL, SP, ST, SV, SZ, TR, UK, and YU; **North Africa:** AG, EG, LB, MO, MR, TU; AFR, and NAR (Kovář 2007).

Chilocorus distigma Klug, 1835

Chilocorus distigma Klug, 1835: 49.

Remarks. This is a rare species and found only in natural ecosystems. It was found only during February and March and was collected using a SN.

Material examined. **Asir:** Al Majardah, Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, SN, Al Dhafer et al., 2♀4♂71exs; 11.III.2012, LT, Al Dhafer et al., 1♀7exs; Baisha, Wadi Targ, 19°37.37'N, 42°18.02'E, 1370 m, 14.III.2012, SN, Al Dhafer et al., 1ex; Muhail, Wadi Hali, 18°30.12'N, 42°02.21'E, 440 m, 11.II.2016, SN, Fadl, H., 1ex.

Local distribution. This species was collected from Asir and was previously listed by Kovář (2007).

World distribution. **Asia:** SA; **AFR** (Kovář 2007); **YE** (Raimundo and van Harten 2000).

Parexochomus Barovskij, 1922

Parexochomus nigripennis (Erichson, 1843)

Chilocorus nigripennis Erichson, 1843: 267.

Remarks. This species was reported as a predator of mealybugs (Talhouk 1982) and is known as the biocontrol agent of aphids such as *Aphis nerii* Boyer de Fonscolombe,

1841, a pest of *Nerium oleander* L., and a predator on the soft scale insect *Najacoccus serpentinus* Green, 1919, a pest of *Tamarix articulata* Vahl (Martin 1972).

Material examined. **Asir:** Khamis Mushait, Wadi Bisha, 18°20.01'N, 42°42.13'E, 1990 m 27.IV.2011, SN, Al Ansi, A., 1ex; **Najran:** Rijla, Wadi Najran, 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, Al Ansi et al., 4exs; Al Mofejah, 17°27.25'N, 44°03.48'E, 1263 m, 16.I.2013, BS, Al Ansi et al., 1♂1♀; **Baha:** Wadi Bawah, 20°43.93'N, 41°16.82'E, 1347 m, 8.XI.2012, BS, Fadl, H., 1ex; **Riyadh:** Dirab, 23°30'N, 46°51'E, 4.V.1987, SN, 1♀1ex; 9.XII.1990, SN, 1ex; Al Kharj, 20°24'N, 46°29'E, III.1980, SN, 1♂; Huraymila, 25°09'N, 46°08'E, 13.II.1988, SN, Al Dawood, A., 1♀2exs; Al Waseel, 24°48.40'N, 46°30.42'E, 20.X.2011, SN, Al Rashedi, H., 1ex; Ad Diriyah, 24°40'N, 46°35'E, 8.XII, SN, 1ex; 29.XII.2009, SN, Abdel-Gayyed, 1ex; **Tabouk:** Tabuk-Dhuba Rd., 28°18.39'N, 36°02.87'E, 824 m, 15.IX.2011, SN, Al Ansi, A., 1ex; **Qaseem:** Buraydah, 26°12.954'N, 44°02.48'E, 633 m, 17.IX.2011, SN, Al Ansi, A., 4exs; Riyadh, 24 43.01"N, 46 38.65"E, 1972, ANMA, 6exs; 18.IV.1978, SN, A.Talhok et al., ANMA, 8exs, det. Fürsch, 1979; 2.II.1985, Abdulkader A., ANMA, 54 exs.

Local distribution. This species was found throughout the KSA and collected from Asir, Baha, Najran, Riyadh, Tabouk, and Qaseem during this study. It was also reported by Shalaby (1962) from Asir, listed by Martin (1972), and reported by Becari (1971) from Asir, by Fürsch (1979) from Riyadh, and by Talhouk (1982) from Riyadh and Qaseem regions.

World distribution. **Asia:** AE, AF, IN, IQ, PAL, LE, PA, SA, SI, and SY; **Europe:** IT, PT, and SP; **North Africa:** AG, CI, EG, LB, MA, MO, and TU; **AFR** (Kovář 2007); YE (Raimundo and van Harten 2000).

Parexochomus nigromaculatus (Goeze, 1777)

Coccinella nigromaculata Goeze, 1777: 248.

Remarks. This species is known as a predator of mealybugs and aphids as mentioned by R. D. Pope (1969) on the label data and was collected from wild vegetation and natural habitats. It was found from February to May and in September.

Material examined. **Asir:** Abha, Sodah, 18°16.27'N, 42°21.52'E, 24.IV.2011, SN, Al Ansi, A., 1♀; Khamis Mushait, Wadi Bisha, 18°20.01'N, 42°42.13'E, 1990 m 27.IV.2011, SN, Al Ansi, A., 1♂; Abha, Habalah, 18°02.05'N, 42°51.49'E, 25.IV.2011, SN, Al Ansi, A., 1ex; Ahd Rifdh, 18°06.33'N, 42°53.82'E, 16.I.2013, SN, Al Ansi, A., 1♀; Al Majardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 13.III.2012, BS, Al Dhafer et al., 1♀; 12.X.2013, SN, Sonbati, S., 1ex; Al Majardah, Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, SN, Al Dhafer et al., 2♀2♂; Muhail, Wadi Hali, 18°30.12'N, 42°02.21'E, 440 m, 11.II.2016, SN, Fadl, H., 2exs; El Torkey, A., SN, 1ex; **Baha:** Wadi Galah, 20°08.08'N, 41°20.56'E, 16.V.2011, SN, Fadl, H., 1♀; Al Mandaq, Wadi Turubah, 20°14.37'N, 41°15.23'E, 3.VI.2012, BS, Al Ansi, A., 1♂; 27.IX.2013, Al Dhafer, H., 2exs; Biljuraishi, 19°55.76'N, 41°26.59'E, 2053 m, 14.IV.2016, SN, Al Ansi, A., 1ex; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m,

12.IV.2016, SU, Al Ansi, A., 2exs; 11.IV.2016, BS, Al Ansi et al., 2exs; Raghdan, 20°34.25'N, 41°45.11'E, 10.IV.2016, SN, Al Ansi, A., 1ex; **Makkah:** Taif, 21°08'N, 40°58'E, 10.IX.1969, R. D. Pope, ANMA, 3exs, on mealy bug.

Local distribution. Adults of this species were collected from different localities of Asir, Baha, and Makkah. This species was previously listed by Fürsch (1979).

World distribution. **Asia:** AF, CY, ES, FE, IN, IQ, PAL, KI, KZ, LE, PA, SY, TD, TR, UZ, WS, and XIN; **Europe:** AB, AL, AR, AU, BE, BH, BU, CR, CZ, DE, EN, FN, FI, FR, GB, GE, GG, GR, HU, IT, KI, KZ, MC, NL, NT, RO, SK, SL, SP, ST, SV, TR, UK, and YU (Kovář 2007); YE (Raimundo and van Harten 2000).

Parexochomus pubescens (Kuster, 1848)

Exochomus pubescens Kuster, 1848: 94.

Remarks. This species is widely distributed in the kingdom and found in both natural and agroecosystems throughout the year. It was collected from *Acacia ehrenbergiana* Hayne, *A. gerrardii* Benth., *Calotropis procera* (Aiton) W. T. Aiton, *Lycium shawii* Roem. and Schult., and *Ziziphus nummularia* (Burm.f.) Wight and Arn. (Abdel-Dayem et al. 2017). It is primarily known as a predator of aphids (Kapur 1959).

Material examined. **Asir:** Al Majardah, Wadi Al Talalie, 19°05.19'N, 41°47.78'E, 286 m, 1.VI.2012, BS, Al Ansi, A., 1♂; Al Majardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, BS, Al Ansi, A., 1♀; 2.VI.2012, LT, Abdel-Dayem, M., 1ex; 12.III.2012, LT, 1ex; 12.III.2012, SN, Al Dhafer et al., 1ex; Al Majardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 31.V.2012, BS, Al Ansi, A., 1♂; 13.III.2012, BS, Al Dhafer et al., 1ex; Al Majardah, Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, BS, Al Dhafer et al., 1♂; 11.III.2012, SN, Al Dhafer et al., 1ex; Abha, Sodah, 18°16.27'N, 42°21.52'E, 24.IV.2011, SN, Al Ansi et al., 1ex; Al Majardah, Thalooth Al Mandhar, Wadi Baqrah, 18°47.57'N, 42°01.12'E, 433 m, 31.V.2012, BS, Al Ansi, A., 1ex; 10.XI.2012, BS, Fadl, H., 11exs; 13.III.2012, BS, Abdel-Dayem et al., 1ex; **Baha:** Al Mandaq, Wadi Turubah, 20°14.37'N, 41°15.23'E, 3.VI.2012, LT, Al Ansi, A., 1♂2♀; 27.IX.2013, Al Dhafer, H., 2exs; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 3.VI.2012, SN, Kondrateiff et al., 1♂4exs; 18.V.2010, BS, Sharaf, M., 1♂; 10.III.2012, BS, Al Dhafer et al., 1ex; 11.IV.2016, BS, Al Ansi et al., 1♂; Al Mikhwah, 19°49.44'N, 41°22.85'E, 430 m, 7.III.2013, BS, Al Harbi et al., 2exs; Wadi Al Zaraeib, 15.V.2010, BS, Sharaf, M., 1ex; **Jizan:** Al Aydabi, Wadi Qasi, 17°26.52'N, 42°57.32'E, 284 m, 23.V.2012, BS, Al Ansi, A., 1♂; Al Aydabi, 17°21.67'N, 43°02.70'E, 272 m, 22.V.2012, SN, Al Ansi, A., 1♂; Al Aydabi, Haqu Fifa, 17°07.95'N, 43°02.59'E, 253 m, 21.V.2012, BS, Al Ansi, A., 1♂1ex; Aiban-Sabya Rd., Wadi Shahdan, 17°28.27'N, 42°51.19'E, 433 m, 13.XI.2012, BS, Fadl, H., 1♂11exs; Abu Arish-Al Aridhah Rd., Wadi Jizan, 17°01.34'N, 42°56.73'E, 127 m, 11.XI.2012, BS, Fadl, H., 7exs; Jizan-Abu Arish Rd, 17°04.25'N, 42°47.05'E, 24.II.2015, SN, Al Harbi, M., 1ex; Sabya, City Center, 17°14.27'N, 42°46.42'E, 43 m, 23.V.2012, BS, Al Ansi, A., 4exs; Ayban-Sab-

ya Rd., Wadi Qasi, 17°26.52'N, 42°57.32'E, 284 m, 12.XI.2012, BS, Fadl, H., 2exs; Aiban, Haqu Fifa, 17°07.95'N, 43°02.59'E, 253 m, 11.XI.2012, BS, Fadl, H., 1ex; Al Aridhah, Wadi Al Rad, 17°04.10'N, 43°04.33'E, 192 m, 21.V.2012, BS, Al Ansi, A., 1ex; Hurub, Wadi Qasi, 17°26.52'N, 42°57.32'E, 284 m, 24.V.2012, BS, Al Ansi, A., 1ex; **Najran:** Wadi Shuaib Barran, 17°28.94'N, 44°05.52'E, 1325 m, 16.I.2013, BS, Al Ansi et al., 1ex; Hubuna, Lahumah, 17°50.47'N, 44°16.82'E, 1212 m, 14.I.2013, BS, Al Ansi et al., 1ex; **Riyadh:** Huraymila, 25°09'N, 46°08'E, 1.XII.1988, SN, 1ex; Shuaib Huraymila, 25°06.10'N, 46°04.22'E, 804 m, 22.IV.2012, BS, Al Ansi, A., 5exs; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 89exs were collected by BS and SU on branches of *A. ehrenbergiana*, *A. gerrardii*, *C. procera*, *L. shawii* and *Z. nummularia*; through IX-XII 2011; I-V, XI.2012; I, III.2013. **Qaseem:** Buraydah, 26°12.954'N, 44°02.48'E, 633 m, 17.IX.2011, SN, Al Ansi et al., 1♂1♀.

Local distribution. This species was collected from a variety of habitats in Asir, Baha, Jizan, Najran, Riyadh, and Qaseem provinces and previously reported by Kapur (1959) from Hejaz; Fürsch (1979) from Riyadh, Asir, Jizan, and Makkah; and Abdel-Dayem et al. (2017) from Riyadh.

World distribution. **Asia:** AF, IN, IQ, PAL, and SA; **Europe:** FR, GR, IT, and SP; **North Africa:** AG, EG, LB, MO, and TU; **AFR** (Kovář 2007); YE (Raimundo and van Harten 2000) and AE (Raimundo et al. 2007).

Parexochomus sjoestedti Weise, 1910

Parexochomus sjoestedti Weise, 1910: 260.

Remarks. This is a rare species and Afrotropical in distribution. There is no literature to confirm its presence in Saudi Arabia, except the Catalogue of Kovář (2007), and it was also not collected during this study.

World distribution. **A:** SA; **AFR** (Kovář 2007).

Tetrabrachini Kapur, 1948

Tetrabrachys Kapur, 1948

All the three species are restricted to the Arabian Peninsula and some Afrotropical countries. Although several researchers (Kapur 1948; Fürsch 1979; Kovář 2007) have reported these three species from the KSA, not a single species was recorded during the present study.

Tetrabrachys arabicus Kapur, 1948

Tetrabrachys arabicus Kapur, 1948: 329.

Remarks. This species is restricted to the Arabian Peninsula. It was recorded from the KSA by Kapur (1948), Fürsch (1979), and Kovář (2007) but not found during the present study.

Local distribution. Al Hejaz (Kapur 1948); Asir (Fürsch 1979).

World distribution. **Asia:** SA and YE (Kovář 2007).

***Tetrabrachys minutus* (Pic, 1903)**

Lithophilus minutus Pic, 1903: 170.

Remarks. This is also a rare species that was recorded from the KSA by Kapur (1948) and Kovář (2007) without definite localities. It was not found in the present study.

World distribution. **Asia:** SA; **North Africa:** TU (Kovář 2007).

***Tetrabrachys tenebrosus* (Weise, 1910)**

Lithophilus tenebrosus Weise, 1910: 53.

Remarks. This is a rare species found in the Arabian Peninsula and Africa; it was recorded from the KSA by Kapur (1948) and from the KSA and Yemen by Kovář (2007) without definite localities. It was not found in the present study.

World distribution. **Asia:** SA and YE; **AFR** (Kovář 2007).

Coccinellini Latreille, 1807

***Bulaea* Mulsant, 1850**

***Bulaea lividula bocandei* Mulsant, 1850**

Bulaea bocandei Mulsant, 1850: 71, 1016.

Remarks. Members of *Bulaea* are phytophagous and feed on the pollen of plants. This species was collected on *Aerva javanica* (Burm. f.) Juss. ex Schult (Amaranthaceae), and it was also known to feed on leaves and pollen (Raimundo et al. 2007).

Material examined. **Asir:** Al Majardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 31.V.2012, BS, Al Ansi, A., 1♀12exs; Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.V.2011, SN, Fadl, H.; Setyaningrum et al., 1ex; Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 15.IV.2016, SN, Soliman, A., 2exs; Maraha, Wadi Reem, 17°52.55'N, 42°16.66'E, 136 m, 9.II.2016, SN, Fadl, H., 2exs; Maraha, Wadi Ramlan, 17°47.18'N, 42°22.95'E, 180 m, 9.II.2016, SN, Al Ansi, A., 3exs; SU, Al Ansi, A., 12exs; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 14.IV.2016, SN, Soliman,

A., 1ex; **Jizan:** Abu Arish Wadi Jizan, 17°01.34'N, 42°56.73'E, 127 m, 21.V.2012, BS, Al Ansi, A., 577exs; 21.V.2012, BS, Al Ansi, A., 4♂2♀; Hurub-Al Sahaleel Rd., 17°47.34'N, 42°85.65'E, 456 m, 24.V.2012, BS, Al Ansi, A., 7exs; Al Aydabi Jaorat Aiban, 17°25.53'N, 43°03.50'E, 343 m, 23.V.2012, SN, Al Ansi, A., 2exs; 11.XI.2012, BS, Fadl, H., 21exs; Al Aydabi Haqu Fifa, 17°21.54'N, 43°02.62'E, 237 m, 21.V.2012, SN, Al Ansi, A., 1ex; Aiban Sabya Rd. Wadi Shahadan, 13.XI.2012, BS, Fadl, H., 6exs; Jizan-Addarab Wadi Baiz, 17°37.56'N, 42°22.24'E, 249 m, 24.II.2015, HP, Al Harbi, M., 6exs; Jizan, 10.II.1982, SN, Talhouk et al., ANMA, 22exs; 25.XII.1980, SN, Talhouk et al., ANMA, 3exs; 15.VIII.1982, SN, Talhouk et al., ANMA, 1ex. **Riyadh:** Al Uyaynah, 24°53'N, 46°22'E, 24.V.2007, SN, 1ex; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 29.VIII.2013, BS, 1ex, on *Ziziphus nummularia*; Wadi Ad Dawsir, 20°25.83'N, 44°56.53'E, 641 m, 17.I.2013, BS, Al Ansi et al., 10exs.

Local distribution. This species was found in Asir, Baha, Jizan, and Riyadh, but the majority of specimens of *B. lividula bocandei* were collected from several localities of Jizan province. This species was previously reported by Kapur (1959) from Asir, by Fürsch (1979) from the Eastern region and by Abdel-Dayem et al. (2017) from Riyadh.

World distribution. **Asia:** AE, IN, IQ, PAL, JO, PA, SA, SY, and YE; **North Africa:** AG, EG, and MO; **AFR** (Kovář 2007).

Cheilomenes Chevrolat, 1836

Cheilomenes lunata lunata (Fabricius, 1775) *

Figure 2

Coccinella lunata lunata Fabricius, 1775: 86.

Diagnosis. Pronotum is black with white anterolateral angles and anterior margin; elytra are black with large and rounded yellow-reddish spots. Pattern of spots on each elytron: separated spots on the shoulder, but mostly shoulder spot united with scutellar spot to a semi-circular spot outside the humeral callus; two rounded spots in the elytral centre: one near the suture and one in a more marginal position; two spots on the posterior half of elytron: one forming an inverted horizontal C and the other one stretching along the posterolateral elytral margin.

Material examined. **Asir:** Abha, Raydah, 18°12.10'N, 42°24.54'E, 2578 m, 16.IV.2016, SN, Soliman, A., 1♀; Rijal Alma, Wadi Sabin, 17°48.25'N, 42°21.64'E, 194 m, 10.II.2016, SU, Al Ansi, A., 1♂1♀; **Baha:** Wadi Turubah, 20°14.37'N, 41°15.23'E, 10.V.2011, SN, Fadl et al., 1♂.

Local distribution. This species was previously recorded from Yemen by Raimundo et al. (2006) and collected from Asir and Baha provinces during the present study.

World distribution. **North Africa:** EG; **AFR** (Kovář 2007); **Asia:** YE (Raimundo et al. 2006) and a new country record for the KSA.

Figure 2. Dorsal view of *Cheilomenes lunata lunata*. Scale bar: 1 mm.

***Cheilomenes lunata yemenensis* Fürsch, 1989**

Cheilomenes lunata yemenensis Fürsch, 1989 (2): 37–38.

Remark. A rare subspecies that is confined only to the Arabian Peninsula and was described from Yemen. In Saudi Arabia, it is widely distributed in both natural habitats and agroecosystems.

Materials examined. **Asir:** Abha, Sodah, 18°16.27'N, 42°21.52'E, 24.IV.2011, SN, Al Ansi et al., 1ex; Al Majardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, BS, Al Ansi, A., 1♂; 12.III.2012, SN, Al Dhafer et al., 1ex; Wadi Turubah, 20°14.37'N, 41°15.23'E, 14.V.2011, SN, Fadl et al., 1♂; 14.X.2010, SN, Al Dhafer et al., 1♀; Abha, Raydah, 18°12.10'N, 42°24.54'E, 2578 m, 8.II.2016, SU, Al Ansi, A., 1ex; 16.IV.2016, SN, Soliman, A., 2exs; Al Ansi et al., SU, 1ex; Rijal Alma, Wadi Sabin, 17°48.25'N, 42°21.64'E, 194 m, 10.II.2016, SN, Fadl, H., 1ex; **Baha:** Wadi Dhahyan Dam, 20°05.51'N, 41°24.11'E, 883 m, 9.V.2011, SN, Fadl et al., 1ex; Ghabat Amdhan, 20°06.32'N, 41°17.15'E, 19.V.2010, SN, El Torkey, A., 1ex; Shada Al Aala, 19°50.58'N, 41°18.69'E, 1666 m, 14.IV.2016, HP, Abdel-Dayem, M., 1ex; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 12.IV.2016, SN, Al Ansi, A., 1ex; Ragh-

dan, 20°34.25'N, 41°45.11'E, 10.IV.2016, SU, Al Ansi, A., 1ex; **Jizan:** Fifa, 17°16'N, 43°05'E, 1.II.1983, SN, Talhouk et al., ANMA, 15exs; 25.I.1983, SN, ANMA, 38exs; **Makkah:** Taif Rd., 12.X.2010, SN, Al Dhafer et al., 2exs.

Local distribution. Specimens of this species were collected from Asir, Baha, Jizan, and Makkah provinces. It was previously reported from the KSA by Kovář (2007) but with no distributional range.

World distribution. Asia: This species is confined to the Arabian Peninsula and was recorded only from SA and YE (Kovář 2007).

Cheilomenes propinqua vicina (Mulsant, 1850)

Cydonia propinqua vicina Mulsant, 1850: 411.

Remark. This species is associated with a wide range of both natural habitats and agroecosystems, predating on other arthropods. It was known to predate particularly on aphids such as *Rhopalosiphum maidis* (Fitch, 1856), a pest of *Setaria italica* (L.) (Martin 1972; Raimundo and van Harten 2000).

Materials examined. Asir: Khamis Mushait, Wadi Bisha, 18°20.01'N, 42°42.13'E, 1990 m, 27.IV.2011, SN, Al Ansi, A., 1ex; Al Majardah Wadi Yabah, 19°16.27'N, 41°48.46'E, 411 m, 12.V.2012, Al Ansi, A., LT 2exs, SN 5exs; Al Majardah, Wadi Al Talalie, 19°05.19'N, 41°47.78'E, 286 m, 12.III.2012, SN, Al Ansi, A., 2exs; Al Majardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 13.III.2012, BS, Al Dhafer et al., 2exs; Khamis Mushait, 18°18'N, 42°45'E, 4.X.2005, SN, 1ex; Wadi Abha, 18°22.03'N, 42°50.82'E, 1990 m, 28.IV.2011, SN, Al Ansi, A., 2exs; Habalah, 18°02.05'N, 42°51.49'E, 25.IV.2011, SN, Al Ansi, A., 1ex; Al Majardah Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, SN, Al Dhafer et al., 4exs; 11.V.2011, SN, Fadl, H., 1♂6exs; Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013, SN, Al Ansi et al., 1ex; Muhail, Wadi Hali, 18°30.12'N, 42°02.21'E, 440 m, 11.II.2016, SU, Al Ansi, A., 4exs; Rijal Alma, Wadi Sabin, 17°48.25'N, 42°21.64'E, 194 m, 10.II.2016, SN, Fadl, H., 1ex; Maraha, Wadi Reem, 17°52.55'N, 42°16.66'E, 136 m, 9.II.2016, SU, Al Ansi, A., 5exs; Maraha, Wadi Ramlan, 17°47.18'N, 42°22.95'E, 180 m, 10.II.2016, SU, Al Ansi et al., 2exs; Maraha, Wadi Itwad, 17°48.25'N, 42°21.64'E, 149 m, 8.II.2016, SU, Al Ansi, A., 2exs; **Baha:** Wadi Turubah, 20°14.37'N, 41°15.23'E, 14.V.2011, SN, Fadl, H., 2exs; 14.III.2012, SN, Fadl, H., 1ex; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 11.V.2011, SN, Fadl, H., 8exs; 14.IV.2016, SN, Soliman, A., 1ex; 12.IV.2016, SU, Al Ansi, A., 3exs; SN, 1ex; 15.V.2011, SN, Fadl, H., 2♂8exs; 3.VI.2012, HP, Abdel-Dayem, M., 1ex; Wadi Milan, 19°50.79'N, 41°21.01'E, 481 m, 7.III.2013, SN, Al Harbi et al., 2exs; Al Mikhwah-Muhail Rd. Local distribution. Specimens of this species were collected from Asir, Baha, Jizan, Makkah, Najran, and Riyadh and previously reported by Kapur (1959) from Asir and Al Hajaz, by Beccari (1971) from Jizan and Madinah, by Fürsch (1979) from Asir, and by Talhouk (1982) from Jizan, and listed by Martin (1972).

World distribution. **Asia:** IQ, PAL, LE, SA, and YE; **North Africa:** AG, EG, and LB; **AFR** (Kovář 2007).

Coccinella L., 1758

Coccinella septempunctata L., 1758

Coccinella septempunctata L., 1758: 365.

Remark. This species is widely distributed around the world and found in a wide range of habitats. Both adults and larvae are voracious predators of aphids (Sattar et al. 2008). It is a biocontrol agent of *Aphis craccivora* C.L. Koch, 1854, and *Therioaphis trifolii* (Monell, 1882), pests of alfalfa, *Medicago sativa* L. (Martin 1972).

Material examined. **Eastern Province:** Al Ahsa, 22°17.53'N, 50°40.46'E, 4.III.2011, SN, Al Ansi, A. 1ex, on alfalfa; 4.III.2011, SN, Al Ansi, A., 1ex; **Riyadh:** Al Ammariyah, 24°49'N, 46°26'E, 28.I.2009, SN, Widman, A., 1ex, on alfalfa; 28.I.2008, SN, Valenza, B., 2exs, on alfalfa; 28.I.2009, SN, Setyaningrum, H., 1♀1ex; Ad Diriyah, 24°40'N, 46°35'E, 29.X.2008, SN, Al Ahmari, A., 1♀, on alfalfa; 29.X.2008, SN, Bel Hareth, H., 2exs, on alfalfa; 16.I.2009, SN, Setyaningrum, H., 1ex; 29.X.2008, SN, Al Sebaiei, M., 4exs, on alfalfa; 29.X.2008, SN, Al Qahtani, M., 1ex, on alfalfa; 17.IV.2003, SN, Al Habeeb, A., 1ex, on alfalfa; 17.X.2003, SN, Al Saiari, M., 1ex; 30.XII.1989, SN, Amro, 1ex, on pepper; 21.II, SN, Al Essa, M., 1ex; Al Kharj, 20°24'N, 46°29'E, 24.III.2010, SN, Al Othman, A., 1ex; 26.XI.2008, SN, Sofan, A., 3exs, on water melon; 26.XI.2008, SN, Widman, A., 1♂, on alfalfa; 14.XI.2007, SN, 1ex; 26.X.1991, SN, Al Ahmadi, F., 1ex, on alfalfa; 9.III.2001, SN, Al Baqami, A., 1ex; Al 16.X, SN, Al Sharaf, M., 1ex; Al Uyaynah, 24°53'N, 46°22'E, 10.III.2010, SN, Al Hashel, A., 1ex; 30.XI.2010, SN, Al Ansi, A., 1ex, on corn; 11.XI.2008, SN, Setyaningrum, H., 3exs; 11.XI.2008, SN, Setyaningrum, H., 1ex; 26.II.2004, SN, Droshy, R., 1ex, on alfalfa; 7.III.2004, SN, Jasim, D., 1♂; 4.V.2005, SN, Turkestani, S., 1ex; 2.X.2003, SN, Al Haj, M., 1ex; 9.IV.2008, SN, Al Tork, 1ex, on alfalfa; Al

Waseel, 24°48.40'N, 46°30.42'E, 12.XI.2008, SN, Al Qahtani, M., 1ex, on alfalfa; 1.XII.2010, SN, Al Abdul Muhsen, M., 1ex; 12.XI.2008, SN, Namooosy, S., 2exs, on alfalfa; 20.XI.2011, SN, Al Mater, A., 1ex; 11.X, SN, Al Farhan, 1ex, on alfalfa; 20.XI.2011, SN, Al Sahwan, K., 1ex; 12.XI.2008, SN, Baziyad, A., 3exs, on alfalfa; Riyadh, SN, Abu Yaman, 1ex; Dirab, 23°30'N, 46°51'E, 30.XII.2009, SN, Setyanin-grum, H., 1ex, on grass; 7.III.2011, SN, Salah, A., 1ex, on fig plant; 25.I.1990, SN, 1ex, on alfalfa; 10.X.2011, SN, Al Amro, S., 1ex; Hautet Bani Tamim, 23°27.26'N, 46°41.13'E, 4.IV.2008, SN, Al Dhafer et al., 2exs; Otaiqah, 24°35.46'N, 46°42.24'E, 16.XI.1989, SN, 1ex, on Squash; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 11.IV.2011, SN, 1ex; Al Uayainnah, 25.II.2015, SN, Al Sofayan, M., 1ex; Riyadh, 15.III.1978, SN, Talhouk et al., ANMA, 5exs; **Tabuk:** Tabuk-Dhuba Rd., 28°18.39'N, 36°02.87'E, 824 m, 15.IX.2011, SN, Al Ansi, A., 1ex; Tabuk-Madinah Rd., 28°23.47'N, 36°51.96'E, 808 m, 14.IX.2011, SN, Al Ansi, A., 1ex.

Local distribution. Its specimens were collected from Eastern Province, Riyadh and Tabouk; this species was previously listed by Martin (1972), Talhouk (1982), and Walker and Pittaway (1987) and reported by Beccari (1971) from Riyadh, by Fürsch (1979) from Riyadh, and by Abdel-Dayem et al. (2017) from Riyadh.

World distribution. Asia: AF, ANH, BEI, BT, CY, FE, FUG, GAN, GUA, GUI, GUX, HEB, HEI, HEN, HUB, HUN, IN, IQ, PAL, JA, JIA, JIL, JIX, JO, KA, KI, KU, KZ, LE, LIA, NIN, NMO, MG, NC, NP, PA, QIN, SA, SCH, SC, SD, SHA, SHG, SHN, SHX, SI, SY, TAI, TD, TIA, TM, TR, UP, UZ, XIN, XIZ, YUN, and ZHE; **Europe:** AB, AL, AN, AR, AU, BE, BH, BU, BY, CR, CT, CZ, DE, EN, FI, FR, GB, GE, GG, GR, HU, IR, IT, LA, LS, LT, LU, MC, MD, NL, NR, NT, PL, RO, SK, SL, SP, ST, SV, SZ, TR, UK, and YU; **North Africa:** MR; AFR, NAR, and ORR (Kovář 2007).

Coccinella undecimpunctata menetriesi Mulsant, 1850

Coccinella undecimpunctata menetriesi Mulsant, 1850: 104.

Remark. This species with several subspecies is widely distributed throughout the world. Both adults and larvae are known as predators of aphids. It is commonly found in the KSA throughout the year. It is known as a good biocontrol agent of *Aphis craccivora* C.L. Koch, 1854, and *Therioaphis trifolii* (Monell, 1882), pests of alfalfa, *Medicago sativa* L. (Martin 1972).

Material examined. Asir: Wadi Abha, 18°22.03'N, 42°50.82'E, 1990 m, 28. Local distribution. Specimens of this species are found throughout the kingdom and were collected from Asir, Baha, Eastern province, Makkah, Riyadh, Tabouk, and Qaseem in the present study. This species was previously listed from Saudi Arabia by Martin (1972) and Walker and Pittaway (1987) and reported by Beccari (1971) from Riyadh, Talhouk (1982) from Riyadh and Makkah, and Abdel-Dayem et al. (2017) from Riyadh.

World distribution. **E:** GR, IT, and ST; **N:** AG, AZ, EG, LB, and TU; **A:** AE, AF, ES, GAN, GUI, HEB, IN, IQ, PAL, JO, KI, KU, KZ, MG, NMO, NIN, PA, SA, SCH, SHA, SHX, SI, SY, TR, UP, WS, and XIN (Kovář 2007).

Harmonia* Mulsant, 1846**Harmonia axyridis* (Pallas, 1773)**

Coccinella axyridis Pallas, 1773: 716.

Remark. This species is a predator of aphids (Koch 2003).

Material examined. **Riyadh:** Ad Diriyah, 24°40'N, 46°35'E, 4.V.2005, SN, Turkestani, S., 1ex.

Local distribution. This species was recently recorded by Biranvand et al. (2019) from Riyadh as a new record to SA.

World distribution. **Asia:** ES, FE, GAN, GUA, GUI, GUX, HKG, HEB, HEI, HEN, HKG, HUB, HUN, JA, JIA, JIL, JIX, KZ, LIA, MG, NC, NIN, NMO, SC, SCH, SD, SHA, SHN, SHX, TAI, WS, XIN, YUN, and ZHE; introduced to **Europe:** CZi, FRi, GBi, and GEi; **NAR** and **ORR** (Kovář 2007); SA (Biranvand et al. 2019), widely distributed as an invasive species in most continents (Roy et al. 2016).

Hippodamia* Chevrolat, 1836**Hippodamia variegata* (Goeze, 1777)**

Adonia variegata Goeze, 1777: 247.

Remark. This is a common species found almost throughout Saudi Arabia in a wide range of habitats. Both larvae and adults of this species are known as predators of aphids.

Material examined. **Asir:** Abha, Sodah, 18°16.27'N, 42°21.52'E, 24.IV.2011, SN, Al Ansi, A., 3exs; Al Majardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2. Local distribution. Asir, Baha, Eastern Province, Makkah, Riyadh, and Tabuk. It was previously recorded from Jizan by Beccari (1971), from Riyadh and Makkah by

Talhounk (1982) and by El-Hawagry et al. (2013), from Baha and Abdel-Dayem et al. (2017) from Riyadh and listed by Walker and Pittaway (1987).

World distribution. **Asia:** AE, AF, BEI, BT, FE, FUJ, GAN, HEB, HEN, HP, HUN, IN, IQ, PAL, JIL, JO, KA, KI, KZ, LE, LIA, MG, NC, NMO, NIN, NP, PA, SA, SC, SCH, SHA, SHX, SD, SI, SY, TD, TM, TR, UP, UZ, WS, YE, YUN, XIN, and XIZ; **Europe:** AB, AE, AL, AN, AR, AU, BE, BH, BU, BY, CR, CT, CZ, DE, EN, FI, FR, GB, GE, GG, GR, HU, IT, LA, LS, LT, LU, MC, MD, NL, NT, PL, PT, RO, SK, SL, SP, ST, SV, SZ, TR, UK, and YU; **North Africa:** AG, CI, EG, LB, MO, MR, and TU; **AFR, NAR, and ORR** (Kovář 2007).

Oenopia Mulsant, 1850

Oenopia oncina (Olivier, 1808)

Coccinella oncina A. G. Olivier, 1808: 1048.

Remark. Presence of this species could not be confirmed, although it was listed from the KSA by Kovář (2007).

World distribution. **Asia:** AE, AF, GAN, IN, IQ, PAL, JO, KA, KI, KU, KZ, LE, MG, PA, SA, SI, SY, TD, TM, TR, and UZ; **Europe:** AB, AR, BU, GR, and TR; **North Africa:** EG (Kovář 2007).

Psyllobora Chevrolat, 1836

Psyllobora bisoctonotata (Mulsant, 1850)

Thea bisoctonotata Mulsant, 1850: 204.

Remarks. This species was found in a variety of habitats from greenhouses, open crop fields, and in natural habitats from low to highlands. Both adults and larvae of this species feed on fungi (Raimundo and van Harten 2000).

Material examined. **Asir:** 8–20 km outside from Abha-Taif Rd., 1976, Wittmer et al., ANMA, 1ex; Abha, Sodah, 18°16.27'N, 42°21.52'E, 19.III.2009, SN, Al Dhafer et al., 5♂2♀, on squash plants; 24.IV.2011 SN, Al Ansi et al., 2♂; Abha, Raydah, 18°12.10'N, 42°24.54'E, 2578 m, 8.II.2016, SU, Al Ansi, A., 1ex; Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013 BS, Al Ansi et al., 7♀4♂; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 15.V.2011, SN, Fadl et al., 1♂; 13.X.2010, SN, Al Dhafer et al., 1♂; 12.IV.2016, SU, Al Ansi, A., 2exs; Wadi Turubah, 20°14.37'N, 41°15.23'E, 14.V.2011, SN, Fadl et al., 1♂1ex; 27.IX.2013, Al Dhafer, H., 12exs; Al Atawlah, 20°18.37'N, 41°20.52'E, 2160 m, 24.IV.2013, BS, Al Ansi et al., 11exs; **Makkah:** Taif, 21°08'N, 40°58'E, 10.IX.1969, SN, ANMA, 4exs; **Najran:** Rijila, Wadi Najran, 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, Al Ansi et al., 20♂8♀; 15.I.2013, SN, Al Ansi et al., 1♂; Wadi Shuaib Barran, 17°28.94'N, 44°05.52'E,

1325 m, 16.I.2013, BS, Al Ansi et al., 1♂; **Riyadh:** Ad Diraiyah, 5.VIII.1983, Abu Thoria, ANMA, 1ex; 21.XII.1963, SN, Abu Thoria, ANMA, 1ex.

Local distribution. This species is widely distributed in the KSA and was collected from Asir, Baha, Makkah, Najran, and Riyadh. It was previously reported by Shalaby (1962) from Makkah, Beccari (1971) from Makkah, Fürsch (1979) from Asir, and Talhouk (1982) from Makkah.

World distribution. **Asia:** AE, AF, IN, IQ, PAL, JO, KA, PA, SA, SY, UP, and YE; **North Africa:** EG; **AFR** and **ORR** (Kovář 2007).

Xanthadalia Crotch, 1874

Xanthadalia effusa rufescens (Mulsant, 1850)

Xanthadalia effusa (Erichson, 1843)

Harmonia rufescens Mulsant, 1850: 76.

Remark. This is a rare species, limited to only Afrotropical region; its presence in the KSA was not confirmed, and only Kovář (2007) enlisted it from the country.

World distribution. **Asia:** SA and YE; **North Africa:** EG; **AFR** (Kovář 2007).

Epilachnini Mulsant, 1846

Henosepilachna Li, 1961

Henosepilachna hirta (Thunberg, 1781)

Coccinella hirta Thunberg, 1781: 23.

Remark. This species was found from high elevated lands of Asir province and exhibited an Afrotropical distribution. It is a phytophagous coccinellid.

Material examined. **Asir:** Abha, 18°14'N, 42°31'E, 27–28. VIII.1978, Shalaby, F., ANMA, 2exs; Abha Raydah, 18°12.10'N, 42°24.54'E, 2578 m, 4.XI.2013, HP, Abdel-Dayem et al., 1♀; 8.II.2016, SU, Al Ansi, A., 3♀5♂.

Local distribution. Specimens of this species were collected from Raydah mountains of Asir and previously reported by Shalaby (1962) from Asir and by Beccari (1971) from Asir.

World distribution. **Asia:** SA (Shalaby 1962; Beccari 1971); South, West, and Central Africa (Fürsch 1991).

Chnootriba Chevrolat, 1837

Chnootriba elaterii orientalis (Zimmermann, 1936)

Coccinella elaterii Rossi, 1794

Coccinella chrysomelina Fabricius, 1775 (1): 277.

Remark. This is a phytophagous coccinellid. Members of this species were found to be associated with squash and cucurbits. This species is phytophagous and has been reported as a serious pest of Cucurbitaceae (Raimundo and van Harten 2000).

Material examined. Asir: Khamis Mushait Wadi Bin Hashbal, 18°35.44'N, 42°39.01'E, 1892 m, 26.IV.2011, SN, Al Ansi, A., 1ex; Khamis Mushait, 18°18'N, 42°45'E, 17.IV.2016, SN, Soliman, A., 1ex; Abha Raydah, 18°12.10'N, 42°24.54'E, 2578 m, 5.XII.2013, HP, Khan, S., 1ex; 16.IV.2016, HP, Al Dhafer, H., 1ex; Thalooth Al Mandhar Wadi Baqrah, 18°47.57'N, 42°01.12'E, 433 m, 12.X.2013, HP, El Torkey, A., 6exs; HP, Rasool, I., 2exs; **Baha:** Wadi Ghanuna, 19°24.67'N, 41°36.39'E, 348 m, 11.V.2011, SN, Fadl, H., 2exs; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 11.V.2011, SN, Fadl, H., 1ex; 11.IV.2016, SN, Al Ansi, A., 1ex; Wadi Al Arg Qilwah-Adhom Rd., 20°29.98'N, 40°48.95'E, 429 m, 9.XI.2012, BS, Fadl, H., 1♂ 1ex; **Jizan:** Baysh, 17°42.71'N, 42°53.19'E, 102 m, 23.II.2015, HP, Al Harbi et al., 1ex; Wadi Gowra Aiban, 17°17.57'N, 43°04.21'E, 451 m, 11.XI.2012, SN, Fadl, H., 1ex; Jizan city, 16°54'N, 42°29'E, 20.I.1979, SN, Talhouk et al., ANMA, 12exs, det. Local distribution. This species is widely distributed in Saudi Arabia and was collected from Asir, Bahah, Jizan, Makkah, Riyadh, and Qaseem. It was previously recorded from Zilfi approximately 160 miles northwest of Riyadh by Kapur (1959); from Eastern Province, Riyadh, Makkah, and Tabouk by Beccari (1971); and from Riyadh by Fürsch (1979) and listed by Martin (1972) and Walker and Pittaway (1987).

World distribution. Asia: AF, CY, IN, IQ, PAL, JO, SI, SA, SY, PA, TR, and YE; **North Africa:** EG and LB; **AFR** (Kovář 2007).

Noviini Mulsant, 1850

Novius Mulsant, 1850

Remark. The species of genus *Rodolia* have been placed in *Novius* based on the latest paper by Pang et al. (2020).

Novius argodi (Sicard, 1909)

Rodolia argodi Sicard, 1909: 142.

Remark. This species is known as a predator of scale insects, including *Icerya purchasi* Maskell, as mentioned in the label data by Fürsch (1968); it is a pest of *Citrus* spp. and *Casuarina* sp. (Martin 1972).

Material examined. Riyadh: Specimen was taken from ANMA collection that was collected from Riyadh city, V.1966, ANMA, 1ex, det. Fürsch 1968.

Local distribution. This species was listed by Martin (1972) and reported from Asir and Makkah by Abu-Thuraya (1982).

World distribution. Asia: SA (Martin 1972; Abu-Thuraya 1982); it is widespread in Africa (Raimundo and van Harten 2000); AE (Raimundo et al. 2007).

Novius cardinalis (Mulsant, 1850)

Vedalia cardinalis Mulsant, 1850: 906.

Remark. This species became famous at the end of the 19th century when it was introduced from its native country Australia to California for the control of cottony cushion scale (*I. purchasi*) in citrus orchards, producing the first major success in biological control. This species is now introduced to all continents, except Antarctica (Raimundo and van Harten 2000).

Material examined. Asir: Khamis Mushait, Wadi Baisha, 27.IV.2011, SN, Al Ansi, A., 1♀; **Baha:** Al Mandaq, Wadi Turubah, 20°14.37'N, 41°15.23'E, 3.VI.2012, BS, Al Ansi, A., 2♂1♀; Raghdan, 20°34.25'N, 41°45.11'E, 16.V.2010, SN, Al Dhafer et al., 1♀; Rahwan, 20°04.03'N, 41°27.01'E, 2272 m, 24.V.2013, BS, Al Ansi et al., 2exs; King Saud Rd., 20°00.28'N, 41°27.91'E, 2132 m, 25.V.2013, BS, Al Ansi et al., 3exs.

Local distribution. Specimens of this species were collected from Asir and Baha provinces and previously reported from Najran by Abu-Thuraya (1982).

World distribution. Asia: AE, FUG, HAI, GUA, HEN, HKG, HUB, IN, PAL, JA, JIA, JIX, JO, PA, SC, SCH, SHA, SHG, TAI, TR, YUN, and ZHE; **Europe:** AL, BU, CR, FR, GR, IT, MA, PT, SP, and TR; **North Africa:** CI, AG, EG, LB, MO, and TU; **AFR, AUR, NAR, NTR, and ORR** (Kovář 2007).

Novius yemenensis (Raimundo & Fürsch, 2006)*

Figure 3

Rodolia yemenensis Raimundo & Fürsch, 2006: 219–220.

Diagnosis. This species is restricted to the Arabian Peninsula and can be identified by the following characters: body entirely reddish to reddish brown, some specimens have blackish head and pronotum, without black patterns on elytra and with white semi-erect short setae. Punctures on elytra are larger than those on pronotum. Base of elytra is slightly concave with rounded shoulders.

Figure 3. Dorsal view of *Novius yemenensis*. Scale bar: 1 mm.

Material examined. **Asir:** Thalooth Al Mandhar Wadi Baqrah, 18°47.57'N, 42°01.12'E, 433 m, 12.X.2013, HP, Abdel-Dayem, M., 1♀; Rijal Almaa, Wadi Sabbin, 17°48.25'N, 42°21.64'E, 194 m, 10.II.2016, SU, Al Ansi, A., 1♀; **Jizan:** Sabya-Hurub Rd., 17°16.94'N, 42°17.54'E, 97m, 24.V.2012, SN, Al Ansi, A., 1♂; **Riyadh:** El-Jola Riyadh-Makkah Rd., 24°20.42'N, 45°47.29'E, 11.X.2010, SN, Al Dhafer et al., 1♂; King Abdullah street, in front of King Abdulaziz city, 24 43.01'N, 46 38.65'E, 21.III.2010, HP, El Gharbawy, A., 1♂; Dirab, 23°30'N, 46°51'E, 1.XI.2009, ST, Al Dhafer et al., 1♀.

Local distribution. This species was collected from Asir, Jizan, and Riyadh provinces.

World distribution. **Asia:** YE (Raimundo et al. 2006); newly recorded from SA.

Diomus Mulsant, 1850

Diomus rubidus (Motschulsky, 1837)

Scymnus rubidus Motschulsky, 1837: 418.

Material examined. Riyadh: As Sullayyil-Najran Rd., 18°01.35'N, 42°45.81'E, 619 m, 17.I.2013, BS, Al Ansi, A., 1♂; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 14.IV.2012, PT, 1♂1♀, under *C. procera*, 14.IV.2012, PT, 1♂1♀, under *L. Shawii*; 23.VI.2012, PT, 1♀, under *C. procera*.

Local distribution. It was collected from Riyadh (Abdel-Dayem et al. 2017) and previously reported by Fürsch (1979) from Riyadh.

World distribution. Asia: IN, IQ, PAL, LE, SA, SY, and YE; **Europe:** AR, CR, FR, GR, and IT; **North Africa:** AG, EG, LB, MO, and TU (Kovář 2007); AE (Raimundo et al. 2007).

Hyperaspidini Mulsant, 1846

***Hyperaspis* Chevrolat, 1836**

***Hyperaspis polita* Weise, 1855**

Hyperaspis polita Weise, 1855: 60.

Remark. This species is a predator of the mealybug *Nipaecoccus viridis* (Newstead, 1894) (Alizadeh et al. 2013).

Materials examined. Riyadh, 2.II.1980, Talhouk et al., ANMA, 1♀.

Local distribution. It was collected from Riyadh and previously listed in the taxonomic key by Fürsch (1979).

World distribution. Asia: AF, CY, PAL, SY, TD, TM, and TR; **North Africa:** LB; **AFR** (Kovář 2007), SA (Fürsch 1979).

***Hyperaspis pumila pumila* Mulsant, 1850**

Hyperaspis pumila Mulsant, 1850: 655.

Material examined. Asir: Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 15.V.2011, SN, Fadl et al., 1♀; Thalooth Al Mandhar Wadi Baqrah, 18°47.57'N, 42°01.12'E, 433 m, 4.XI.2013, LT, Al Dhafer et al., 1♀; Muhail Wadi Hali, 18°30.12'N, 42°02.21'E, 440 m, 11.II.2016, SU, Al Ansi, A., 1♀; Dirab, 23°30'N, 46°51'E, 19.III.2014, PT, Al Harbi, M., 1♀, under palm tree.

Local distribution. This species was collected from Asir, Baha, and Riyadh provinces. It was previously catalogued only by Kovář (2007) with no information about its distribution in the KSA.

World distribution. Asia: SA and YE; **North Africa:** LB; **AFR** (Kovář 2007).

***Hyperaspis vinciguerrae* Capra, 1929**

Hyperaspis vinciguerrae Capra, 1929: 241.

Remark. This species is a predator of aphids (Raimundo et al. 2007) and Pseudococcidae (mealybugs) such as *Macronellicoccus hirsutus* Green, 1908, and *Planococcus* sp., pests of *Ficus carica*, and on *Nipaecoccus vastator* (Maskell, 1895), a pest of *Citrus* spp. (Martin 1972).

Material examined. **Asir:** Al Majardah, Wadi Al Talalie, 19°05.19'N, 41°47.78'E, 286 m, 1.VI.2012, BS, Al Ansi, A., 6♂; Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 15.IV.2016, SN, Al Ansi, A., 2♂1♀; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 5.V.2015, HP, Soliman, A., 1♂; **Baha:** Wadi Ghanuna, 19°24.67'N, 41°36.39'E, 348 m, 11.V.2011, SN, Fadl et al., 2♂; **Jizan:** Farasan Island, 16°41.46'N, 42°07.22'E, 9.II.2012, SN, Deeming, J., 1♂; **Najran:** Hubuna Lahumah, 17°50.47'N, 44°16.82'E, 1212 m, 14.I.2013, BS, Al Ansi et al., 1♀; **Riyadh:** Dirab, Education Farm KSU, 24°40'N, 46°35'E, 24.IX.2011, LT, Fadl, H., 1♂; Ad Diriyah, 24°40'N, 46°35'E, 10.XI, SN, Farhan, 1♂; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, II-VI-II.2012, 13♂, 1♀, 1ex, using BS, MT, SN, and LT, on on *C. procera*, *Rhazya steica* and *L. shawi*; Al Ammariyah, 17.X.2013, SN, Sonbati, S., 1♀; Riyadh, 18.IV.1978, SN, Talhouk et al., ANMA, 3exs; 28.X.1977, SN, ANMA, 6exs; 15.IX.1977, SN, ANMA, 3exs; **Tabuk:** Tabuk-Dhuba Rd., 28°18.39'N, 36°02.87'E, 824 m, 15.IX.2011, SN, Al Ansi, A., 2♂; **Qaseem:** Buraydah, 26°12.954'N, 44°02.48'E, 633 m, 17.IX.2011, Al Ansi, A., 2♂.

Local distribution. It is widely distributed in Saudi Arabia and was collected from Asir, Baha, Jizan, Najran, Riyadh, Tabuk, and Qaseem provinces. Before this study, it was reported by Fürsch (1979) from Riyadh, by Abu-Thuraya (1982) from Riyadh and Madinah, by Talhouk (1982) from Riyadh, and by Abdel-Dayem et al. (2017) from Riyadh; it was listed by Martin (1972).

World distribution. **Asia:** SA and YE; **North Africa:** LB; **AFR** (Kovář 2007); **AE** (Raimundo et al. 2007), **IN** (Biranvand et al. 2017).

Scymnini Mulsant, 1846

Clitostethus Weise, 1885

Clitostethus arcuatus (Rossi, 1794)*

Figure 4

Coccinella arcuata Rossi, 1794: 88.

Remark. This species is reported as a predator on the whitefly *Siphoninus phillyreae* (Haliday, 1835) (Hemiptera: Aleyrodidae) in Iran (Tavadjoh et al. 2010).

Diagnosis. Body is dark brown to black, covered with rather long, whitish hairs; head is black; pronotum is whitish, at its middle with several black spots; elytra black or brown, with two arched concentric horseshoe-shaped lines, crossing the suture with their posterior part.

Materials examined. **Asir:** Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013, BS, Al Ansi, A., 1ex.

Local distribution. This is a newly recorded genus from Saudi Arabia; it was collected from Asir province.

Figure 4. Dorsal view of *Clitostethus arcuatus*. Scale bar: 1 mm.

World distribution. **Asia:** IN, IQ, SY, and TR; **Europe:** AL, AR, AU, AZ, BH, CR, CZ, FR, GB, GE, GG, GR, HU, IT, NL, RO, SK, ST, SZ, UK, and YU; **North Africa:** CI, and MR; **AFR** and **NAR** (Kovář 2007); new record for SA.

Nephus Mulsant, 1846

Nephus (Bipunctatus) conjunctus (Wollaston, 1870)

Scymnus conjunctus Wollaston, 1870: 248.

Remark. Despite extensive visits throughout the kingdom, this species was not collected during this study period. This species is a predator of aphids (Raimundo et al. 2007).

Local distribution. Asir (Füirsch 1979).

World distribution. **E:** IT, PT, and SP; **N:** AG, CI, EG, MO, and TU; **A:** PAL, SA, and TR; **AFR** (Kovář 2007); **AE** (Raimundo et al. 2007).

Nephus (Bipunctatus) nigricans (Weise, 1879)*

Figure 5

Scymnus (Nephus) bipunctatus nigricans Weise, 1879: 154.

Diagnosis. Body is oval, shining, convex; antennae are 9-segmented; pubescent body, overall black species; each elytron has one large reddish spot in the posterior half.

Materials examined. **Asir:** Al Majardah Wadi Baqrah Amer Dam, 18°47.57'N, 42°01.12'E, 433 m, 31. V.2012, BS, Al Ansi, A., 1♂; **Baha:** Bani Farwah, 20°02.13'N, 41°29.37'E, 2065 m, 25.IV.2013, BS, Al Ansi et al., 1♀; Baidah Dam, 20°11.88'N, 41°24.06'E, 1880 m, 24.IV.2013, BS, Al Ansi et al., 1♂1♀.

Local distribution. Members of this species were collected from Asir and Baha provinces.

World distribution. **Asia:** TR and YE (Raimundo and van Harten 2000), new country record for Saudi Arabia; **Europe:** AL, CR, FR, GR, IT, and TR (Kovář 2007), HU, SK (Haviar and Merkl 2004).

Figure 5. Dorsal view of *Nephus nigricans*. Scale bar: 1 mm.

Nephus (Bipunctatus) ornatulus Korschefsky, 1931*

Figure 6

Nephus (Bipunctatus) ornatulus Korscefsky, 1931: 152.

Diagnosis. Body is elongate oval, covered with whitish pubescence; elytra are generally black, each with two yellowish spots: the anterior one is small or inconspicuous, sometimes invisible, located on the disc, and the posterior one is subapical, large, circular, or transverse.

Materials examined. Asir: Wadi bin Hashbal, 18°35.44'N, 42°39.01'E, 1892 m, 26.IV.2011, SN, Al Ansi et al., 1♀; Al Magardah Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, BS, Al Ansi, A., 1♂.

Local distribution. Members of this species were collected from Asir; it was not previously known in Saudi Arabia.

World distribution. Asia: YE, new country record for Saudi Arabia; **Africa:** Mauritania, Sierra Leone, Cameroon, and Senegal (Raimundo et al. 2006).

Figure 6. Dorsal view of *Nephus ornatulus*. Scale bar: 1 mm.

Nephus (Bipunctatus) wittmeri Fürsch, 1979

Nephus wittmeri Fürsch, 1979: 245.

Remark. This is a rare species reported only from the KSA and in a few Afrotropical countries.

Materials examined. **Asir:** Al Magardah Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, BS, Al Ansi, A., 1♂; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 11. V.2011, SN, Fadl et al., 1ex; **Riyadh:** Nursery, 29.IX.2007, SN, Al Dhafer et al., 1ex; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 18.II.2012, SN, 4exs, on *R. steica*.

Local distribution. It was reported from Riyadh by Fürsch (1979); in the present study, it was collected from Asir and Baha. It was also reported from Riyadh by Abdel-Dayem et al. (2017).

World distribution. A: SA; AFR (Kovář 2007).

Nephus (Geminosipho) arcuatus Kapur, 1959

Nephus (Geminosipho) arcuatus Kapur, 1959: 287.

Remark. This species is found in regions of the Middle East and Africa with an Afrotropical distribution and found in natural habitats. It was generally collected in the months of May and June.

Materials examined. **Asir:** Al Magardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, BS, Al Ansi, A., 2exs; Al Magardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 31. V.2012, BS, Al Ansi, A., 3exs; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 3.VI.2012, BS, Al Ansi, A., 1♂5exs; **Jizan:** King Faisal Sport City, 16°48.23'N, 42°59.49'E, 11m, 20.V.2012, BS, Al Ansi, A., 1♀; Hurub, Wadi Hurub, 17°43.12'N, 42°57.88'E, 398 m, 24.V.2012, BS, Al Ansi, A., 1♂; **Najran:** Hubuna, Al Dhaiqah, 17°50.71'N, 44°15.83'E, 1228 m, 14. I.2013, BS, Al Ansi et al., 1ex.

Local distribution. Specimens of this species were collected from Asir, Baha, Jizan and Najran. It was previously reported by Fürsch (1979) from Asir.

World distribution. Asia: IN, SA, and YE; AFR (Kovář 2007); AE (Raimundo et al. 2007).

Nephus (Geminosipho) fenestratus (Sahlberg, 1913)

Scymnus fenestratus Sahlberg, 1913: 83.

Remark. This species was not found during the present study, although it was previously recorded from Riyadh and Jizan provinces.

Local distribution. Riyadh and Jizan (Fürsch 1979).

World distribution. **Asia:** SA, SY, and YE (Raimundo and van Harten 2000); AE, CY, IN, PAL, JO, and AE (Raimundo et al. 2007); **North Africa:** EG; **AFR** (Kovář 2007).

***Nephus (Nephus) crucifer* Fleischer, 1900**

Nephus crucifer Fleischer, 1900: 235.

Local distribution. This species was found in Asir, Baha, and Makkah and was also reported by Fürsch (1979) from Asir province.

Materials examined. **Asir:** Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013, BS, Al Ansi et al., 3♂3♀; **Baha:** Al Mikhwah, 19°49.44'N, 41°22.85'E, 430 m, 18.V.2010, SN, Al Dhafer et al., 1♂; Wadi Al Zaraeb, 20°03.60'N, 41°23.19'E, 2123 m, 15.V.2010, BS, Sharaf, M., 1♂; Sad Medhas, 20°13.26'N, 41°16.53'E, 1781 m, 9.III.2012, SN, Al Dhafer et al., 1♂; Wadi Turubah, 20°14.37'N, 41°15.23'E, 9.III.2012, SN, Al Dhafer et al., 1♀; Shabreqah station, 20°08.03'N, 41°23.60'E, 2267 m, 24.IV.2013, BS, Al Ansi et al., 1♂1♀; King Saud Rd., 20°00.28'N, 41°27.91'E, 2132 m, 25.IV.2013, BS, Al Ansi et al., 2♂2♀; Shuaib Wadi Turubah, 20°14.37'N, 41°15.23'E, 24.IV.2013, BS, Al Ansi et al., 1♂; Midan Al Shuhadaa, 20°00.00'N, 41°27.99'E, 2124 m, 25.IV.2013, BS, Al Ansi et al., 1♀; Rahwan 10 km outside of Baha, 20°04.03'N, 41°27.01'E, 2272 m, 24.IV.2013, BS, Al Ansi et al., 1♀; Baidah Dam, 20°11.88'N, 41°24.06'E, 1880 m, 24.IV.2013, BS, Al Ansi et al., 1♂; Al Lishtah Village 20 km outside of Baha, 26.IV.2013, BS, Al Ansi et al., 1♂; Makkah: Baha-Taif Rd. Bani Malik Wadi Rakhmat, 20°42.15'N, 40°59.46'E, 1616 m, 20°42.15'N, 40°59.46'E, 1616 m, 4.VI.2012, BS, Al Ansi, A., 1♀.

World distribution. **Asia:** IN, SA, TD, UZ, and KZ; **AFR** (Kovář 2007).

***Nephus (Sidis) hiekei* (Fürsch, 1965)**

Scymnus hiekei Fürsch, 1965: 201.

Remark. This species is known as a predator of the mealybug *Planococcus citri* (Risso, 1813 (Fürsch 1970, Abu-Thuraya 1982, Raimundo and van Harten 2000).

Materials examined. **Riyadh:** Ad Diriyah, 24°40'N, 46°35'E, 17.XI.2011, SN, Al Omar, A., 1ex; 15.IX.2011, SN, Al Omar, A., 1ex; Al Ammariah, 24°49'N, 46°26'E, 24.XI.2009, SN, Sharaf, M., 1ex.

Local distribution. It is restricted to Riyadh province and previously reported from Riyadh by Fürsch (1979) and Abu-Thuraya (1982) and listed by Martin (1972) and Talhouk (1982). In this study, it was collected from Riyadh.

World distribution. **Asia:** AE, IN, IQ, PAL, LE, SA, and TR; **Europe:** IT, GR, and SP; **North Africa:** AG, EG, MO, and TU (Kovář 2007).

***Nephus (Sidis) levaillanti* (Mulsant, 1850)**

Scymnus levaillanti Mulsant, 1850: 964.

Remark. The specimens were collected by PT on the branches of *Acacia gerrardii* and under the shrub *Z. nummularia*. Some specimens were also collected under the canopies of *Acacia ehrenbergiana* during April and July. This species is a predator on *Aphis gossypii* Glover, 1877 (Fürsch 1970) and *A. orientalis* (Abu-Thuraya 1982).

Materials examined. Riyadh: Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 28.IV.2012, PT, 1 ♀, under *A. ehrenbergiana*; 28.IV.2012, PT, 1 ♂, under *A. gerrardii*; 1.VII.2012, BS, 1 ♀, on *A. gerrardii*; 14.IV.2012, BS, 1 ex, on *Z. nummularia*.

Local distribution. Specimens were collected from Riyadh (Abdel-Dayem et al. 2017) and also previously was reported from Riyadh and Eastern provinces by Abu-Thuraya (1982) and listed by Martin (1972).

World distribution. Asia: SA (Raimundo and van Harten 2000); AF, FE, IN, PAL, JA, JO, LE, PA, SHA, and TAI; **Europe:** GR and IT; **North Africa:** EG; **AFR** and **ORR** (Kovář 2007).

Scymnus Kugelann*, 1794**Scymnus (Pullus) agrumi* Fürsch, 1970**

Scymnus (Pullus) agrumi Fürsch, 1970: 109.

Remark. This is a very rare species that is endemic to Saudi Arabia and found to be a predator of the mealybug *P. citri* (Fürsch 1970, Martin 1972; Abu-Thuraya 1982).

Material examined. Eastern region: Qatif, 26°45'N, 49°58'E, 1969, Fürsch, ANMA, 1 ex, paratype.

Local distribution. It was described from the Eastern province of KSA by Fürsch (1970), reported by Abu-Thuraya (1982) also from Eastern Province, and listed by Martin (1972).

World distribution. Asia: Endemic to SA (Fürsch 1970; Kovář 2007).

***Scymnus (Pullus) arabicus* Fürsch, 1989**

Scymnus arabicus Fürsch, 1989: 116.

Remark. This is also a rare species that has not been collected since its description by Fürsch (1989). It is endemic to Saudi Arabia.

Local distribution. It was found in Asir province (Fürsch 1989).

World distribution. Asia: Endemic to SA (Fürsch 1989; Kovář 2007).

***Scymnus (Pullus) auritus* Thunberg, 1795**

Scymnus (Pullus) auritus Thunberg, 1795: 105.

Remark. Presence of this species was not confirmed, except in the catalogue of Kovář (2007) with insufficient details regarding its distribution in Saudi Arabia. However, it is well distributed around the world.

World distribution. **Asia:** ANH, CY, ES, FE, FUJ, GUA, IN, SA, SCH, SY, TR, and WS; **Europe:** AL, AU, BH, BU, BY, CR, CT, CZ, DE, EN, FI, FR, GB, GE, GG, GR, HU, LA, LT, LU, MC, MD, NR, NT, PL, PT, RO, SK, SL, SP, ST, SV, SZ, TR, UK, and YU (Kovář 2007).

***Scymnus (Pullus) ebneri* Weise, 1926**

Scymnus ebneri Weise, 1926: 228.

Remark. This is also a rare species and known as a predator of aphids (Abu-Thuraya 1982; Talhouk 1982).

Material examined. **Eastern province:** Qatif, 26°45'N, 49°58'E, 5.VIII.1970, det. R. D. Pope, 1971, ANMA, 1 ex, on alfalfa.

Local distribution. It was reported from Riyadh by Abu-Thuraya (1982) and listed by Martin (1972) and Talhouk (1982).

World distribution. **Asia:** AE, IN, and SA (Abu-Thuraya 1982). **North Africa:** EG; **AFR** (Kovář 2007).

***Scymnus (Pullus) latemaculatus* Motschulsky, 1858**

Scymnus (Pullus) latemaculatus Motschulsky, 1858: 121.

Remark. Specimens of this species could not be examined due to the unavailability of material.

Local distribution. This species was reported from Riyadh by Fürsch (1979).

World distribution. **Asia:** AF, FUJ, GUA, GUX, IN, PA, TAI, ZHE, and SA; **North Africa:** LB; **ORR** (Kovář 2007); AE (Raimundo et al. 2007).

***Scymnus (Pullus) luxorensis* Fürsch, 1989**

Scymnus (Pullus) luxorensis Fürsch, 1989: 116.

Remark. This is a rare species with limited geographical distribution. It was collected from *L. shawii* using a beating sheet in October; it is also not common in its type locality range.

Material examined. Riyadh: Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 30.X.2011, BS, Al Ansi, A., 1♂, on *L. shawii*.

Local distribution. It was described from Riyadh by Fürsch (1989) and also collected again from Riyadh by Abdel-Dayem et al. (2017).

World distribution. Asia: It was described from SA (Fürsch 1989) and also known in **North Africa:** EG (Kovář 2007).

Scymnus (Pullus) subvillosus (Goeze, 1777)

Coccinella subvillosus Goeze, 1777: 247.

Remark. This is a very common species found throughout the year in SA and also widely distributed throughout the most world countries. This species was primarily collected from the habitats of *A. ehrenbergiana*, *A. gerrardii*, *C. procera*, *L. shawii*, *R. stricta*, and *Z. nummularia*.

Material examined. Asir: Al Majardah Wadi Al Talalie, 19°05.19'N, 41°47.78'E, 286 m, 1.VI.2012, BS, Al Ansi, A., 1ex; Al Majardah Wadi Khat, 19°05.37'N, 41°58.37'E, 13.III.2012, BS, Abdel-Dayem et al., 3exs; 31.V.2012, BS, Al Ansi, A., 4exs; Al Majardah Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, SN, Al Dhafer et al., 1ex; 11.III.2012, LT, Al Dhafer et al., 1ex; Al Majardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, SN, Al Ansi, A., 2♀30exs; 2.VI.2012, BS, Al Ansi, A., 1♂4♀37exs; 12.III.2012, SN, Al Dhafer et al., 1ex; Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013, SN, Al Ansi et al., 2exs; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 11.V.2011, SN, Fadl et al., 1ex; 10.III.2012, SN, Al Dhafer et al., 1♂, 2exs; 3.VI.2012, BS, Al Ansi, A., 1ex; **Jizan:** Al Aydabi Jaorat Aiban, 17°25.53'N, 43°03.50'E, 343 m, 17°25.53'N, 43°03.50'E, 343 m, 23.V.2012, BS, Al Ansi, A., 2exs; **Najran:** Rijla Wadi Najran, 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, Al Ansi et al., 15exs; Wadi Shuaib Barran, 17°28.94'N, 44°05.52'E, 1325 m, 16.I.2013, BS, Al Ansi et al., 7exs; Hubuna Al Dhaiqah, 17°50.71'N, 44°15.83'E, 1228 m, 14.I.2013, BS, Al Ansi et al., 11exs; Hubuna Lahumah, 17°50.47'N, 44°16.82'E, 1212 m, 14.I.2013, BS, Al Ansi et al., 75exs; **Riyadh:** Al Muzahimiyah Al Khararah, 24°24.21'N, 46°14.40'E, 30.III.2011, SN, Al Dryhim et al., 9exs; 17.IV.2012, LT, Al Dhafer et al., 3exs; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 182 exs collected by SN and B on branches of and by PT under canopy of *A. ehrenbergiana*, *A. gerrardii*, *C. procera*, *L. shawii*, *R. stricta*, *Z. nummularia*; ; also by LT; XII.2011; I, III-VII, IX, XI.2012; I-IX.2013; 11.IV.2011, SN, Al Dryhim et al., 1ex; 11.IV.2011, SN, Al Dryhim et al., 1ex; Hutet Bani Tamim Al Hareeq Rd., 23°32.03'N, 46°47.33'E, 584 m, 8.V.2012, LT, Al Ansi, A., 1ex; Hutet Bani Tamim Ibex Reserve National Park, 23°28.10'N, 46°36.35'E, 28.XII.2007, SN, Al Dryhim et al., 1ex; 19.IV.2008, SN, 4exs; 19.V.2007, SN, 2exs; 21.III.2008, ST, 1ex; 21.III.2008, SN, 1ex; 4.IV.2008, SN, 2exs; Wadi Ad Dawasir, 20°25.83'N, 44°56.53'E, 641 m, 17.I.2013, BS, Al Ansi et al., 1ex; Wadi Namar, 24°32.18'N, 46°34.60'E, 29.II.2012, HP, Al Ansi, A., 1ex; Dirab, 23°30'N, 46°51'E, 26.IV.2010, SN, Rashid, O., 1ex; 14.III.2010, ST, Al Dhafer et al., 1ex; 25.IV.2010, ST, Al Dhafer et al., 1ex;

Local distribution. It was collected from different localities of Asir, Baha, Eastern Province, Jizan, Najran, and Riyadh provinces and previously reported by Fürsch (1979) and Abdel-Dayem et al. (2017).

World distribution. **Asia:** AE, AF, CY, IN, IQ, PAL, JO, KI, KU, KZ, LE, PA, QA, SA, SI, SY, TD, TR, UZ, and YE; **Europe:** AB, AL, AN, AR, AU, AZ, BH, BU, CR, CZ, FR, GE, GG, GR, HU, IT, MC, PT, RO, SK, SL, SP, ST, SZ, TR, UK, and YU; **North Africa:** AE, AG, CI, EG, LB, MO, MR, and TU; **AFR** (Kovář 2007).

Scymnus (Pullus) syriacus (Marsuel, 1868)

Nephus syriacus Marsuel, 1868: 216.

Remark. This is a widely distributed species throughout the year in SA and was collected from the habitats of *A. ehrenbergiana*, *A. gerrardii*, *C. procera*, *L. shawii*, *R. stricta*, and *Z. nummularia*. It is a predator on *Aphis fabae* Scopoli, 1840 (Talhok 1982; Fürsch 1989) and whiteflies and aphids (Martin 1972).

Material examined. **Riyadh:** Hutet Bani Tamim Ibex Reserve National Park, 23°28.10'N, 46°36.35'E, 4.IV.2008, SN, Al Dryhim et al., 2♂30exs; 21.III.2008, SN, 2♀3exs; 28.VII.2007, SN, 1ex; 19.V.2007, SN, 2exs; 19.IV.2008, SN, 1ex; 7.V.2012, LT, Al Ansi, A., 1ex; 28.V.2010, SN, Al Dhafer et al., 2exs; Hutet Bani Tamim-Al Hareeq Rd., 23°32.03'N, 46°47.33'E, 584 m, 8.V.2012, LT, Al Ansi, A., 1♀3exs; Al Hareeq-Ar Rayn Rd., 23°33.88'N, 46°22.53'E, 737 m, 8.V.2012, LT, Al Ansi, A., 1♂; Hutet Bani Tamim, 23°27.26'N, 46°41.13'E, 19.IV.2008, SN, Al Dhafer, H., 7exs; 7.V.2012, HP, Al Ansi, A., 1ex; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 98exs were collected by SN and B on branches of *A. ehrenbergiana*, *A. gerrardii*, *C. procera*, *L. shawii*, *R. stricta* and *Z. nummularia*; and HP under canopy of the previous plants; also by LT; through X, XII.2011; II-VI, X-XII.2012; III, IV, VI, VII.2013; 11.IV.2011, SN, Al Dryhim et al., 1♀; 11.IV.2011, SN, Al Dryhim et al., 1ex; 16.X.2011, LT, 1ex; 26.V.2012, BS, 1♂1ex; 26.V.2012, LT, 1♂1ex; 18.II.2012, SN, 1ex; 26.V.2012, BS, 1♂1ex; 15.V.2012, SN, 1ex; 14.V.2012, BS, 1ex; 14.V.2012, SU, 2exs; 14.V.2012, BS, 1ex; Wadi Namar, 24°32.18'N, 46°34.60'E, 29.II.2012, BS, Al Ansi et al., 1ex; Al Kharj, 20°24'N, 46°29'E, 18.XI.2009, SN, Al Dryhim et al., 2exs; Wadi Ad Dawasir, 20°25.83'N, 44°56.53'E, 641 m, 17.I.2013, BS, Al Ansi et al., 1ex; Al Muzahimiyah Al Khararah, 24°24.21'N, 46°14.40'E, 30.III.2011, SN, Al Dryhim et al., 1♂1♀4exs; **Najran:** Hubuna Al Dhaiqah, 17°50.71'N, 44°15.83'E, 1228 m, 14.I.2013, BS, Al Ansi et al., 2exs; Rijla Wadi Najran, 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, 2exs; Hubuna Lahumah, 17°50.47'N, 44°16.82'E, 1212 m, 14.I.2013, BS, 4exs.

Local distribution. Specimens of this species were collected from Eastern, Najran, and Riyadh provinces and have been previously reported from Eastern Province by Talhouk (1982) and Fürsch (1989), from Eastern province and Baha by El-Hawagry et al. (2013), and from Riyadh by Abdel-Dayem et al. (2017); it was listed by Martin (1972).

World distribution. **Asia:** SA (Fürsch 1989); **Asia:** CY, IN, IQ, PAL, JO, LE, SI, and SY; **North Africa:** EG; (Kovář 2007).

Scymnus (Pullus) yemenensis (Kapur, 1959)

Pullus yemenensis Kapur, 1959: 281.

Remark. This species is distributed only in the Arabian Peninsula and is generally found in the natural habitats of *A. ehrenbergiana* and *C. procera* in the vicinity of hemipterous insects.

Material examined. **Asir:** Abha, Habalah, 18°02.05'N, 42°51.49'E, 25.IV.2013 SN, Al Ansi et al., 5♂1♀1ex; Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013, BS, Al Ansi et al., 7♂3♀; **Baha:** King Saud Rd., 20°00.28'N, 41°27.91'E, 2132 m, 25.IV.2013, BS, Al Ansi et al., 4♂1♀; Al Leishtah Village 20 km outside of Baha, 20°12.16'N, 41°22.21'E, 2231 m, 26.IV.2013, BS, 1♂; Baidah Dam, 20°11.88'N, 41°24.06'E, 1880 m, 24.IV.2013, BS, 2♂1♀; Midan Al Shuhadaa, 20°00.00'N, 41°27.99'E, 2124 m, 25.IV.2013, BS, 2♂5♀; Wadi Turubah, 20°14.37'N, 41°15.23'E, 26.IV.2013, BS, 2♂2♀; Rahwan, 10 km outside of Baha, 20°04.03'N, 41°27.01'E, 2272 m, 24.IV.2013, BS, 1♀; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 25.IV.2013, BS, 1♀; Shabreqah Station, 20°08.03'N, 41°23.60'E, 2267 m, 24.IV.2013, BS, 4♀; Wadi Turubah, 20°14.37'N, 41°15.23'E, 14.V.2011, SN, Al Dhafer, H., Fadl, H., Sharaf, M., 1♂; 14.X.2010, SN, Al Dhafer et al., 1♂1♀; Al Mandaq Wadi Turubah, 20°14.37'N, 41°15.23'E, 3.VI.2012, BS, Al Ansi, A., 1♂; **Najran:** Al Mofejah, 17°27.25'N, 44°03.48'E, 1263 m, 16.I.2013, BS, Al Ansi et al., 1♂; Rijla Wadi Najran, 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, 2♂1♀; Hubuna Lahuma, 14.I.2013, BS, 3♂; Najran- Dhahran Al Janub Rd., 17°36.971'N, 43°32.97'E, 2132 m, 16.I.2013, BS, 1♀; **Riyadh:** Hawtet Bani Tameem- Al Hariq Rd. 15 km, 8.V.2012, LT, Al Ansi, A., 1♂; Wadi Namar, 24°32.18'N, 46°34.60'E, 29.II.2012, HP, Al Ansi, A., 1♂; Dirab, 23°30'N, 46°51'E, 30.XII.2009, SN, Sofan, A., 1♀; Rawdhet Khoraim, 25°22.98'N, 47°16.71'E, 559 m, 14.IV.2012, BS, 1♂ on *A. ehrenbergiana*; 28.IV.2012, LT, 1♀; 14.IV.2012, SN, 1♂; 13.X.2012, LT, 1ex, on *C. procera*; 13.X.2012, SN, 5exs, on *C. procera*.

Local distribution. It was collected from Asir, Baha, Najran, and Riyadh and was previously reported by Fürsch (1979) from Asir and Riyadh and from Riyadh by Fürsch (1989) and also by Abdel-Dayem et al. (2017).

World distribution. **Asia:** OM, SA, and YE (Kovář 2007); AE (Raimundo et al. 2007).

Scymnus (Scymnus) interruptus* (Goeze, 1777)Coccinella interrupta* Goeze, 1777: 247.

Remark. This species is widely distributed in SA and commonly found in natural habitats.

Materials examined. Local distribution. It is found in Asir, Baha, Eastern, Jizan, Makkah, Najran, Riyadh, and Tabuk provinces and previously reported from Asir by Fürsch (1979) as *S. levaillanti* and from Riyadh by Abdel-Dayem et al. (2017).

World distribution. **Asia:** AE, AF, IN, IQ, PAL, JA (Bonin, Ryukyus), JO, KU, LE, OM, NP, PA, SA, SD, SY, TAI, TR, and UP; **Europe:** AZ, GR, IT, PT, and SP; **North Africa:** CI, EG, and MR; **AFR, AUR, and ORR** (Kovář 2007).

Scymnus (Scymnus) scapuliferus Mulsant, 1850*

Figure 7

Scymnus scapuliferus Mulsant, 1850: 968.

Diagnosis. Body is elongated and convex; head is pale in males and black with anterior yellow border in females. Pronotum is black except for a narrow testaceous border on the anterior margin. Elytra are black with yellowish, reddish or pale, nearly quadrangular shoulder spot along the proximal two-thirds. Specimens of this species were found mostly in natural ecosystems, although it has been reported as a predator of the cowpea aphid, *Aphis craccivora* Koch, 1854, in Nigeria (Waterhouse 1998).

Materials examined. **Asir:** Al Majardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, SN, Al Ansi, A., 2♂2♀; 2.VI.2012, BS, 6♂4♀; Al Majardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 13.III.2012, BS, 1♂; 31.V.2012, BS, 1♂; Wadi Gala, 20°08.08'N, 41°20.56'E, 16.V.2011, SN, Fadl et al., 1♂; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 11.V.2011, SN, 4♀; 15.V.2011, SN, 2♂2♀; 10.III.2012, SN, 1♀; 25.IV.2013, BS, Al Ansi et al., 1♂; Al Mikhwah, 19°49.44'N, 41°22.85'E, 430 m, 18.V.2010, SN, Al Dhafer et al., 2♀; Raghadan, 20°34.25'N, 41°45.11'E, 13.V.2011, SN, Fadl et al., 1♀; **Jizan:** Jizan-Ahd Al Masareha Rd., 17°02.28'N, 42°52.38'E, 11.III.2010, LT, Al Dhafer et al., 1♂; 12.III.2010, LT, Al Dhafer et al., 1♀; King Faisal Sport City, 16°48.23'N, 42°59.49'E, 11 m, 20.V.2012, SN, Al Ansi, A., 1♀; Sabya-Hurub Rd., 17°16.94'N, 42°17.54'E, 97 m, 25.V.2012, SN, Al Ansi, A., 1♀.

Local distribution. It was collected from Asir, Baha, and Jizan.

World distribution. This species has been reported from South, Central, and West Africa; Yemen (Raimundo and van Harten 2000); new country record for Saudi Arabia.

Figure 7. Dorsal view of *Scymnus*(*Scymnus*) *scapuliferus*. Scale bar: 1 mm.

Stethorini Dobzhansky, 1924

***Stethorus* Weise, 1885**

***Stethorus gilvifrons* (Mulsant, 1850)**

Scymnus gilvifrons Mulsant, 1850: 995.

Remark. This species is known as a predator of spider mites (Martin 1972; Abu-Thuraya 1982; Talhouk 1982; Raimundo and van Harten 2000) and is generally found in natural ecosystems.

Materials examined. Baha: Wadi Al Zaraeb, 20°03.60'N, 41°23.19'E, 2123 m, 15.V.2010, BS, Sharaf, M., 1ex; Wadi Al Lehian, 20°09.78'N, 41°36.18'E, 1641 m, 25.IV.2013, BS, Al Ansi, A. and Al Harbi, M., 155exs; Al Lieshtah Village 20 km outside of Baha, 20°12.16'N, 41°22.21'E, 2231 m, 26.IV.2013, BS, Al Ansi, A. and Al Harbi, M., 6exs; Baidah Dam, 20°11.88'N, 41°24.06'E, 1880 m, 24.IV.2013, BS, Al Ansi, A. and Al Harbi, M., 1ex; **Eastern Province:** Al Ahsa, 22°17.53'N,

50°40.46'E, 28.XII.1982, Al Shuaaei, M., ANMA, 1ex and **Najran:** Rijla Wadi Najran, 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, Al Ansi, A., 4♂126exs; Wadi Shuaib Barran, 17°28.94'N, 44°05.52'E, 1325 m, 16.I.2013, BS, Al Ansi, A., 38exs.

Local distribution. It was collected from Baha, Eastern Province, and Najran and was previously reported by Fürsch (1979) from Asir and Riyadh, by Abu-Thuraya (1982) from Eastern Province and Riyadh, and by Talhouk (1982) from Eastern Province, Riyadh, and Makkah and was listed by Martin (1972).

World distribution. **Asia:** AF, CY, IN, IQ, KA, LE, PA, SA, SY, and TR; **Europe:** AB, AR, CR, BU, FR, GR, and IT; **North Africa:** EG; **ORR** (Kovář 2007) and YE (Raimundo and van Harten 2000); AE (Raimundo et al. 2007).

Stethorus endrodyi Fürsch, 1970*

Figure 8

Stethorus endrodyi Fürsch, 1970: 98.

Diagnosis. Body is elongated and oval, with dorsal and ventral sides dark, except for the mouth parts, antennae, legs, and frons, which are testaceous; dorsal surface with

Figure 8. Dorsal view of *Stethorus endrodyi*. Scale bar: 1 mm.

short, white, semi-erect, not dense pubescence; pronotum is very sparsely and finely punctate (Fürsch 1970).

Remark. This is a very rare species, and only one specimen was collected from wild vegetation throughout the study period. It is also not common in the rest of the world.

Material examined. Asir: Al Majaredah Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, SN, Al Ansi, A., 1ex.

Local distribution. Individuals of this species were collected from Asir province.

World distribution. YE, Congo, MO, Ivory Coast, Ghana, Angola, and Malawi (Raimundo et al. 2006); new country record for Saudi Arabia.

Sticholotidini Weise, 1901

***Pharoscymnus* Bedel, 1906**

***Pharoscymnus arabicus* Fürsch, 1979**

Pharoscymnus arabicus Fürsch, 1979: 238.

Remark. A rare species that has limited geographical distribution and found only in some countries of the Middle East. It was not collected during the study period.

Local distribution. It was previously reported from Asir by Fürsch (1979).

World distribution. Asia: AE, IN, and SA (Kovář 2007).

***Pharoscymnus c-luteum* (Sicard, 1907)**

Pharus c-luteum Sicard, 1907: 417.

Remark. This is a rare species, only known in the Arabian Peninsula, and found as a predator of armoured scale insects (Hemiptera: Diaspididae) (Raimundo and van Harten 2000).

Materials examined. Asir: Al Majardah, Wadi Khat, 19°05.37'N, 41°58.37'E, 31.V.2012, BS, Al Dhafer et al., 2exs; Al Majardah, Wadi Al Talalie, 19°05.19'N, 41°47.78'E, 286 m, 1.VI.2012, BS, Al Ansi, A., 1ex; Ahd Rifidh, 18°06.33'N, 42°53.82'E, 16.I.2013, BS, Al Ansi et al., 2exs; Al Majardah, Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.IV.2012, BS, Al Ansi, A., 3♂24exs; 2.IV.2012, LT, Al Ansi, A., 1ex; 2.IV.2012, SN, Al Ansi, A., 1ex; Al Majardah, Wadi Thalooth Al Mandhar, 42°01.12'E, 433 m, 31.V.2012, BS, Al Ansi, A., 6exs; **Baha:** Wadi Turubah, 20°14.37'N, 41°15.23'E, 27.IX.2013, Al Dhafer, H., 2exs; Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 10.III.2012, BS, Al Dhafer et al., 1ex; 25.IV.2013, BS, Al Ansi et al., 3exs; 3.VI.2012, BS, Al Ansi, A., 3exs; Al Quhman Village, 5 km before Al Atawilah, 20°19.23'N, 41°19.48'E, 2014 m, 24.IV.2013, BS, Al Ansi et al., 2exs; 18 km before Al Atawilah, 20°25.12'N, 41°19.41'E, 1654 m, 24.IV.2013, BS, Al Ansi et al., 2exs; Raghdan, 20°34.25'N, 41°45.11'E, 13.V.2011, SN, Fadl et al., 1ex; Sad Medhas, 20°13.26'N, 41°16.53'E, 1781 m, 9.III.2012, SN, Al Dhfer et al.,

4exs; **Jizan:** Hurub Wadi Hurub, 17°43.12'N, 42°57.88'E, 398 m, 24.V.2012, BS, Al Ansi, A., 5exs; Hurub Wadi Qasi, 17°26.52'N, 42°57.32'E, 284 m, 24.V.2012, BS, Al Ansi, A., 1ex.

Local distribution. Specimens of this species were collected from Asir, Baha, and Jizan. It was previously reported by Fürsch (1979) from Asir province.

World distribution. Asia: SA and YE (Kovář 2007).

Pharoscymnus fleischeri* (J. Weise, 1883)

Figure 9

Pharus fleischeri J. Weise, 1883: 67.

Remark. This is a rare species with limited geographical range and found only in the Middle East and Germany. It was attracted to light in the month of May.

Material examined. Riyadh: Al Hariq-Ar Raayn Rd., 23°33.88'N, 46°22.53'E, 737 m, 8.V.2012, LT, Al Ansi, A., 1ex.

Local distribution. Riyadh province.

World distribution. Asia: IN and TR and newly recorded from SA. **Europe:** GR (Kovář 2007).

***Pharoscymnus numidicus* (Pic, 1900)**

Pharus numidicus Pic, 1900: 91.

Remark. This species was found in the natural ecosystem of the KSA. It is a very good biological control agent and has been introduced into Morocco for the control of *Parlatoria blanchardi* (Targioni Tozzetti, 1892) (Raimundo and van Harten 2000). Specimens were collected using beating sheet.

Materials examined. Asir: Al Majardah Wadi Yabah, 19°16.27'N, 41°48.46'E, 411, 2.VI.2012, BS, Al Ansi, A., 1♀13exs; 2.VI.2012, SN, Al Ansi, A., 1ex; 12.III.2012, SN, Al Ansi, A., 2exs; Al Majardah Wadi Thalooth Al Mandhar, 42°01.12'E, 433 m, 31.V.2012, BS, Al Ansi, A., 5exs; Al Majardah, Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, SN, Al Dhafer et al., 1♂36exs; Al Majardah, Wadi Baqrah, 18°47.57'N, 42°01.12'E, 433 m, 10.XI.2012, BS, Fadl, H., 2exs; Al Majardah, Wadi Qanunah, 19°24.67'N, 41°36.39'E, 348 m, 11.III.2012, LT, Al Dhafer et al., 1ex; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 18.V.2010, BS, Sharaf, M., 1ex; 3.VI.2012, BS, Al Ansi, A., 1ex; **Jizan:** Al Aydabi Wadi Qasi, 17°26.52'N, 42°57.32'E, 284 m, 23.V.2012, BS, Al Ansi, A., 1♀5exs; Hurub Wadi Qasi, 17°26.52'N, 42°57.32'E, 284 m, 24.V.2012, BS, Al Ansi, A., 1♂4exs; Aiban Sabya Rd. Figure 9. Dorsal view of *Pharoscymnus fleischeri*. Scale bar: 1 mm.

1ex; Al Aaridah Wadi Al Rad, 17°04.10'N, 43°04.33'E, 192 m, 21.V.2012, BS, Al Ansi, A., 5exs; Hurub Wadi Hurub, 17°43.12'N, 42°57.88'E, 398 m, 24.V.2012, BS, Al Ansi, A., 1ex; Al Aaridah Jizan Dam, 17°02.62'N, 42°59.36'E, 187 m, 21.V.2012, BS, Al Ansi, A., 1ex; Wadi Shuaib Barran, 17°28.94'N, 44°05.52'E, 1325 m, 16.I.2013, BS, Al Ansi et al., 1ex.

Local distribution. Members of this species were collected from Asir, Baha, and Jizan, and it was previously reported by Fürsch (1979) from Asir and Riyadh.

World distribution. **Asia:** PAL, JO, and SA; **North Africa:** AG, EG, LB, and TU; **AFR** (Kovář 2007); **AE** (Raimundo et al. 2007).

Pharoscymnus ovoideus Sicard, 1929

Pharoscymnus ovoideus Sicard, 1929: 61.

Remark. This species is a predator of scale insects (Martin 1972; Montaigne and Maouloud 1981; Abu-Thuraya 1982).

Materials examined. Riyadh: Riyadh, 20.VI.1981, Talhouk et al., ANMA, 3exs, det. Fürsch 1967, 1968; Al Hariq Ar Rayn Rd., 23°33.88'N, 46°22.53'E, 737 m, 8.V.2012, LT, Al Ansi, A., 1ex.

Local distribution. It has been recorded in Riyadh and was previously reported by Abu-Thuraya (1982) and listed by Martin (1972).

World distribution. Asia: IN, JO, and SY; **North Africa:** AG, MO, and TU; **AFR** (Kovář 2007), SA (Abu-Thuraya 1982); AE (Raimundo et al. 2007).

Pharoscymnus pharoides (Marsuel, 1868)

Scymnus pharoides Marsuel, 1868: 215.

Remark. Presence of this species was not confirmed, except in the catalogue of Kovář (2007) with insufficient details about its distribution in the KSA. Moreover, not a single specimen was collected during or after the study period.

World distribution. Asia: IN, PAL, SA, SY, and TR; **North Africa:** EG and LB; **AFR** (Kovář 2007).

Pharoscymnus setulosus (Chevrolat, 1861)

Pharus setulosus Chevrolat, 1861: 269.

Remark. No fresh material could be collected to examine this species. Two specimens from the collection of ANMA, collected by R.D. Pope in 1966, were examined. This species was found on a red scale insect, *Aonidiella* sp., according to the information described by R.D. Pope (1966), Martin (1972) and Abu-Thuraya (1982).

Material examined. Eastern Province: Hafuf, 25°15'N, 49°32'E, VI.1966, ANMA, 2exs, det. Pope, 1966.

Local distribution. Specimens were collected from the Eastern province of SA by Pope in 1966 and was also reported by Fürsch (1979) from wadi Awsat and Abu-Thuraya (1982) from Eastern Province and was listed by Martin (1972).

World distribution. Asia: AE, IN, PAL, JO, and SA; **Europe:** SP; **North Africa:** AG, EG, LB, MO, and TU (Kovář 2007).

Pharoscymnus smirnovi Dobzhanskiy, 1927

Pharoscymnus smirnovi Dobzhanskiy, 1927: 240.

Remark. This is a rare species with limited geographical distribution.

Material examined. Riyadh: Riyadh, 18.IV.1978, Talhouk et al., ANMA, 1ex.

Local distribution. Riyadh province.

World distribution. **Asia:** SA; **Europe:** AB, GG (Kovář 2007).

***Pharoscymnus tristiculus* Sicard, 1907**

Pharus tristiculus Sicard, 1907: 418.

Remark. No fresh material could be collected to examine this species. Two specimens from the collection of ANMA, collected by Pope in 1970, were examined. This species was found on citrus scale insects (Hemiptera) according to the information provided by Pope (1970).

Material examined. **Al Madinah:** Ovaيدا farm, 24°25.58'N, 39°36.29'E, 15. IX.1969, SN, ANMA, 2exs, on citrus scale insects, det. Pope 1970.

Local distribution. Specimens were collected from Al Madinah and were also reported by Abu-Thuraya (1982) from Al Madinah.

World distribution. **Asia:** YE; **AFR** (Kovář 2007); SA (Abu-Thuraya 1982).

Microweiseinae Leng, 1920

Serangiini Pope, 1962

***Serangium* Blackburn, 1889**

***Serangium buettikeri* Fürsch, 2000**

Serangium buettikeri Fürsch, 2000 (18): 233.

Remark. This species has been recorded only in the Arabian Peninsula and is a predator of the citrus blackfly *Aleurocanthus woglumi* Ashby, 1915 (Raimundo and van Harten 2000). Individuals were collected from *Ricinus communis* L. using sweep nets.

Materials examined. **Asir:** Wadi Khat, 19°05.37'N, 41°58.37'E, 13.III.2012, BS, Al Dhafer et al., 2exs; **Baha:** Thee Ain, 19°55.78'N, 41°26.60'E, 741 m, 10.III.2012, BS, Al Dhafer et al., 1ex; 11.IV.2016, BS, Al Ansi et al., 1ex; **Najran:** Rijla, Wadi Najran 17°31.56'N, 44°13.65'E, 1257 m, 15.I.2013, BS, Al Ansi, A., 4♂2♀90exs, on *R. communis* L.; 15.I.2013, SN, Al Ansi, A., 1ex, on *R. communis* L.; Wadi Shuaib Barran 17°28.94'N, 44°05.52'E, 1325 m, 16.I.2013, BS, Al Ansi, A., 1ex.

Local distribution. Specimens of this species were reported from Asir, Baha, and Najran provinces and previously reported by Raimundo and van Harten (2000) from Asir.

World distribution. **Asia:** SA and YE (Kovář 2007).

Discussion

Data on the coccinellid fauna of the KSA are scarce. Fürsch (1979), who provided a key for 35 species, did not provide any precise locality information for eight of the

species. Subsequently, Kovář (2007) listed 41 species from the KSA but without localities. Before the present study, 56 species were reported in the KSA (Table 2), and the present survey has added eight new records, including *C. lunata lunata*, *C. arcuatus*, *N. ornatulus*, *N. nigricans*, *P. fleischeri*, *R. yemenensis*, *S. scapuliferus*, and *S. endrodyi*, for the country, one new genus record, *Clitostethus*, and presented a list of 65 species. Despite extensive exploration of the country, 14 previously known species were not collected during the present study, which included six species with known locality data, *N. conjunctus* (from the village Qaaraah near Khamis Mushayt, Wadi Johan Abha, Wadi Maraba, 8–20 km from the Abha-Taif Rd.); *N. fenestratus* (from Wadi Shija; Wadi Hanifah; Wadi Khumra; 28 km Abha-Jizan Rd.; Wadi Ad Dilla; Wadi Mizbil and Salbukh); *S. latemaculatus* (from Khureis); *S. arabicus* (collected Thanomah; 8–20 km from the Abha-Taif Rd.; village Qaaraah near Khamis Mushayt); *P. arabicus* (from Wadi Johan Abha); and *T. arabicus* (from the village Qaaraah near Khamis Mushayt and El Hejdaz), and eight species from unknown localities.

Acknowledgments

The authors would like to express their deepest gratitude to the team of King Saud University Museum of Arthropods for their assistance in field work, technical support, and processing of specimens in the laboratory. Special thanks to the Arabian National Museum of Arthropods, Ministry of Environment, Water and Agriculture, Riyadh, Saudi Arabia, for providing us the reference collection and preserved collection to examine. Thanks to Prof. Boris Kondratieff, Department of Bioagricultural Sciences and Pest Management, Colorado State University, Fort Collins, Colorado, USA, for his critical review and valuable comments. This research was funded by the Deanship of Scientific Research at Princess Nourah bint Abdulrahman University through the Fast-track Research Funding Program. The authors thank the Deanship of Scientific Research and RSSU at King Saud University for their technical support.
