The Neotropics is a region of climatic and physiographic extremes, including among the world’s driest deserts and highest mountains, its largest river basin, vast expanses of tropical lowland rainforests and savannas, temperate forests, and sub-antarctic lands. The region’s long and complex geological history has resulted in the evolution of a hyperdiverse and highly endemic flora and fauna, including a rich and still very incompletely explored diversity of caddisflies, or Trichoptera, living in the region’s great variety of freshwater ecosystems. These insects are critical components of the energy flow and trophic dynamics of the rivers, streams, lakes, and other waterbodies in which they live as larvae and pupae. They are also important as biological indicators of the health and quality of freshwaters, as they are sensitive to most types of human-caused disturbance and pollution. More than 3,200 of the world’s approximately 15,000 caddisfly species occur in the region covered by this catalog (Mexico, the Caribbean, Central, and South America). For each of the 3,262 nominal species treated, information on the type locality, type depository, sex of type, distribution by country, and other pertinent taxonomic or biological information is included. Summary information on taxonomy, phylogeny, distribution, immature stages, and biology are provided for each of the 25 families and 156 genera. Genus-group and species-group synonyms are also listed. An extensive index to all nominal taxa is included to facilitate use of the catalog. This information was compiled from over 1,000 literature citations reviewed through 2015. It is hoped that this work will aid future study and exploration of this diverse order of insects so important to the function and health of the world’s precious freshwater habitats.
AUTHOR GUIDELINES

Authors are kindly requested to submit their manuscript only through the online submission module at http://zookeys.pensoft.net/. In case of difficulties with the submission procedure, please contact zookeys@pensoft.net. Full text of author guidelines is available at: http://zookeys.pensoft.net/about/AuthorGuidelines

EXCEPTS FROM THE GUIDELINES

BODY TEXT. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the http/ftp portion of the address.

CITATIONS WITHIN THE TEXT. Before submitting the manuscript, check each citation in the text against the References to ensure that they match exactly. Delete citations from the list if they are not actually cited in the text of the article. Citations in the text should be formatted as follows: (Smith 1990) or (Smith et al. 1998; Brock and Gunderson 2001; Felt 2006).

REFERENCES. It is crucial to properly format the references, because all references will be linked electronically as much as possible to the paper they cite. For all references, list all authors. You can include a DOI number for the full-text article as an alternative to or in addition to traditional volume and page numbers. Please use the following style for the reference list:

PUBLISHED PAPERS: Polasek A, Alonso-Zarazaga M, Bouchet P. Reference for the genera. Year of publication of animal(s). Author(s) and reference number of animal species name within the text must be provided with author(s)’ names. Year of publication of animal species name is recommended to be given in taxonomic revisions with providing full referencing of original description in the list of references. Accepted Papers: Same as above, but “In press” appears instead the page number.

Link/URL: BBC News: Island leopard deemed new species.

CITATIONS OF PUBLIC-RESOURCE DATABASES: It is highly recommended all appropriate datasets, images, and information to be deposited in public resources. Please provide the relevant accession numbers (and version numbers, if appropriate). Accession numbers should be provided in paren- theses after the entry on first use. Examples of such databases include:

- ZooBank (www.zoobank.org).
- Morphbank (www.morphbank.net).
- Barcode (www.barcodinglife.org)

Providing accession numbers allows linking to and from established databases and integrates your article with a broader collection of scientific information. Please list all accession num- bers directly after the References.

INTERNATIONAL CODE FOR ZOOLOGI- CAL NOMENCLATURE. ZooKeys will publish papers only strictly follow- ing the rules of the 4th edition of the International Code of Zoological Nomenclature. Each first mentioning of an animal species name in the text must be provided with author(s)’ name(s). Year of publication of animal species name is recommended to be given in taxonomic revisions with providing full referencing of original description in the list of references.

OPEN ACCESS FEES. Publication fees for larger papers will be discounted and can be negotiated with the Managing Editor. Open Access Publication Fees are usually covered by institutional funds and grants. Discounts/waivers can be requested by private and retired zoologists, scientists, especially in case of exceptionally good manuscripts.

Discounts will be offered also to sci- entists who actively participate in the reviewing and editing process. PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal’s website). For standing orders/subscriptions please contact the Managing Editor.
