Monterey Bay National Marine Sanctuary (MBNMS), a federal marine protected area located off central California, is host to a diverse fish fauna occupying a variety of habitats. The rich history of ichthyological research and surveys off central California provide a wealth of information to construct the first inventory of fishes occurring within MBNMS.

Critical analyses of material from ichthyological collections at natural history museums, the literature, and visual records were critical in creating an annotated checklist of fishes occurring within MBNMS. The checklist presented herein provides sources of basis, occurrence of fishes during cold- or warm-water events, records of historically occurring fishes, special places of occurrence (i.e., Davidson Seamount, Elkhorn Slough), introduced species, and reference to original species descriptions from within MBNMS. Geographical errors in the literature based on misidentifications in the field are noted.

This inventory provides evidence of occurrence for 507 fishes within MBNMS and an additional 18 species considered to be extralimital. This annotated checklist of fishes can be used by those interested in zoogeography, marine protected areas, ichthyology, regional natural history, and sanctuary management.
ZooKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography and evolution of animals. ZooKeys aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. ZooKeys will publish papers in systematic zoology containing taxonomic/taunistic data on any taxon of any ageological age from any part of the world with no limit to manuscript size.

Focus and Scope

ZooKeys will consider for publishing works on the following topics:
- new descriptions of taxa, if they are accomplished with proper diagnoses, keys and/or revision of at least species group level
- taxonomic revisions of extant (or “recent”) and fossil animal groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing identification keys will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

For those who want their work rapidly known to the World!

AUTHOR GUIDELINES
Authors are kindly requested to submit their manuscript only through the online submission module at http://zookeys.pensoft.net. In case of difficulties with the submission procedure, please contact zookeys@pensoft.net. Full text of author guidelines is available at: http://zookeys.pensoft.net/about/AuthorGuidelines

EXCERPTS FROM THE GUIDELINES

BODY TEXT. All papers must be in English, checked by a native English-speaking colleague (if author(s) are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

WEB (HTML) LINKS. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the http portion of the address.

CITATIONS WITHIN THE TEXT. Before submitting the manuscript, check each citation in the text against the References to ensure that they match exactly. Delete citations from the list if they are not actually cited in the text of the article. Citations in the text should be formatted as follows: Smith (1990) or Smith et al. (1998); Brock and Gunderson (2001); Feb 2006.

REFERENCES. It is crucial to properly format the references, because all references will be linked electronically as much as possible to the papers they cite. For all references, list all authors. You can include a DOI number for the full-text article as an alternative to or in addition to traditional volume and page numbers.

Papers containing identification keys will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

All content is Open Access distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

E-mail: zookeys@pensoft.net

accepted papers: same as above, but “in press” appears instead the page numbers.

CITATIONS OF PUBLIC RESOURCE DATA
Bases: It is highly recommended all appropriate datasets, images, and information to be deposited in pub- lic resources. Please provide the rele- vant accession numbers (and version numbers, if appropriate). Accession numbers should be provided in pa- ratheses after the entity on first use. Examples of such databases include,

no limits to:
- ZooBank (www.zoobank.org).
- MorphBank (www.morphbank.net).
- BarCode (www.barcodinglife.org)

Providing accession numbers allows linking to and from established data- bases and integrates your article with a broad collection of scientific infor- mation. Please list all accession num- bers directly after the References.

INTERNATIONAL CODE FOR ZOOLOGICAL NOMENCLATURE. ZooKeys will publish papers only strictly follow- ing the rules of the 4th edition of the International Code of Zoological Nomenclature. Each first mentioning of an animal species name within the text must be provided with author(s)’ name(s). Year of publication of ani- mal species is recommended to be given in taxonomic revisions with providing full referencing of original description in the list of references.

OPEN ACCESS FEES. Publication fees in open access journals ensure a barrier-free distribution of your pa- per at no charge for the readers and include costs involved in processing, formatting, publishing, indexing and archiving your paper.

The journal charges Open Access Publication Fee (see Article Processing Charges). http://zookeys.pensoft.net/about/ArticleProcessingCharges). Publication fees for larger papers will be discounted and can be negotiated with the Managing Editor.

Open Access Publication Fees are usually covered by institutional funds and grants. Discounts waivers can be requested by private and retired zoologists, scientists from low- and middle-level income countries, postgraduate students, especially in case of exceptionally good manuscripts.

Discounts will be offered also to sci- entists who actively participate in the reviewing and editing process.

PRINTED VERSION. Offprints and printed issues of the journal can be purchased additionally (see journal’s website). For standing orders/sub- scriptions please contact the Manag- ing Editor.
