The genera of Chrysomelidae Galerucinae Alticinae from the Afrotropical region are revised. The monograph includes a key for their identification, habitus photos of all genera, microscope and scanning electron micrographs of many diagnostic morphological characters and an updated annotated catalogue with biogeographical notes that including new distributional data for Sub-Saharan Africa and Madagascar. The following new synonymies are established: *Aphthona* Chevrolat, 1836 = *Ethiopia* Scherer, 1972; *Sanckia* Duvivier, 1891 = *Eugonotes* Jacoby, 1897; *Eurylegna* Weise, 1910a = *Eurylegniella* Scherer, 1972; *Kimongona* Bechyné, 1959a = *Mesocrepis* Scherer, 1963; *Diphalacosoma* Jacoby, 1892a = *Neoderina* Bechyné, 1952; *Sesquiphaera* Bechyné, 1958a = *Paropsiderma* Bechyné, 1958a; *Podagrica* Chevrolat, 1836 = *Podagricina* Csiki in Heikertinger & Csiki, 1940; *Amphimela* Chapuis, 1875 = *Sphaerophysa* Baly, 1876a. The genera *Buphonella* Jacoby, 1903 and *Halticopsis* Fairmaire, 1883 are transferred to tribe Galerucini; the genus *Biodontocnema* Biondi, 2000 stat. prom. is considered to be valid and reinstated at generic level. New combinations are also proposed. Finally a zoogeographical analysis of the flea beetle fauna in the Afrotropical region is provided.
ZooKeys aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. ZooKeys will publish papers in systematic zoology containing taxonomic/faithful data on any taxon of any geological age from any part of the world with no limit to manuscript size.

ZooKeys will consider for publishing works on the following topics:

- new descriptions of taxa, if they are accomplished with proper diagnoses, keys and/or revision of at least species group level
- taxonomic revisions of extant (or “recent”) and fossil animal groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing identification keys will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

For those who want their work rapidly known to the World!

Focus and Scope
ZooKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography and evolution of animals. ZooKeys aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. ZooKeys will publish papers in systematic zoology containing taxonomic/faithful data on any taxon of any geological age from any part of the world with no limit to manuscript size.

ZooKeys will consider for publishing works on the following topics:

- new descriptions of taxa, if they are accomplished with proper diagnoses, keys and/or revision of at least species group level
- taxonomic revisions of extant (or “recent”) and fossil animal groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing identification keys will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.
