This special issue of ZooKeys marks the sixth volume in a series on New World macro-moth systematics. Eight authors contributed six manuscripts for this volume, covering taxa in the Erebidae and Noctuidae. Eight new species and two new genera are described from North America, and an additional 55 taxonomic changes are proposed. Since the last update to the checklist of North American Noctuoidea was published in 2013, numerous changes and corrections have occurred, all of which are summarized here.
ZooKeys

For those who want their work rapidly known to the World!

Focus and Scope
ZooKeys is a peer-reviewed, open-access, rapidly disseminated journal launched to accelerate research and free information exchange in taxonomy, phylogeny, biogeography and evolution of animals. ZooKeys aims to apply the latest trends and methodologies in publishing and preservation of digital materials to meet the highest possible standards of the cybertaxonomy era. ZooKeys will publish papers in systematic zoology containing taxonomic/faithful data on any taxon of any geological age from any part of the world with no limit to manuscript size.

ZooKeys will consider for publishing works on the following topics:
- new descriptions of taxa, if they are accomplished with proper diagnoses, keys and/or revision of at least species group level
- taxonomic revisions of extant (or “recent”) and fossil animal groups
- checklists and catalogues
- phylogenetic and evolutionary analyses
- papers in descriptive and/or historical biogeography
- methodology papers
- data mining and literature surveys
- monographs, conspecti, atlases
- collections of papers, Festschrift volumes, conference proceedings

Papers containing identification keys will be accepted with priority. Extensive manuscripts consisting mostly of keys will be considered for publishing as well.

ISBN numbers will be assigned to large monographic papers (i.e., major revisions of taxa), monographs, collections of papers, Festschrift volumes, atlases, checklists, conspecti.

All content is Open Access distributed under the terms of the Creative Commons Attribution License, which permits unrestricted use, distribution, and reproduction in any medium, provided the original author and source are credited. Authors are thus encouraged to post the pdf files of published papers on their homepages or elsewhere to expedite distribution.

AUTHOR GUIDELINES
Authors are kindly requested to submit their manuscript only through the online submission module at http://zookeys.pensoft.net. In case of difficulties with the submission procedure, please contact zookeys@pensoft.net. Full text of author guidelines is available at: http://zookeys.pensoft.net/about#AuthorGuidelines

EXCERPTS FROM THE GUIDELINES
Brief Text. All papers must be in English, checked by a native English-speaking colleague (if author(s) is/are not native English speaker(s)). Write with precision, clarity, and economy: use the active voice and first person whenever appropriate.

Web (HTML) links. Authors may include links to other Internet resources in their article. This is especially encouraged in the reference section. When inserting a reference to a web-page, please include the http:// portion of the address.

Citations within the text. Before submitting the manuscript, check each citation in the text against the References to ensure that they match exactly. Delete citations from the list if they are not actually cited in the text of the article. Citations in the text should be formatted as follows: (Smith, 1990) or (Smith et al. 1998; Brock and Gurderson 2001; Felt 2006).

References. It is crucial to properly format the references, because all references will be linked electronically as much as possible to the papers they cite. For all references, list all authors. You can include a DOI number for the full-text article as an alternative to or in addition to traditional volume and page numbers. Please use the following style for the reference list:

Accepted Papers: Same as above, but “In press” appears instead the page numbers.

sity of Auckland.

Citations of Public Resource Databases. It is highly recommended all appropriate databases, images, and information to be deposited in public resources. Please provide the rele-
vant accession numbers (and version numbers, if appropriate). Accession numbers should be provided in pa-
renttheses after the entity on first use. Examples of such databases include,
